

① Tim Rogers (NOVA Env) 612/448-9893 x 341

→ - site assessment @ adj property to north

② preferential flow pathways (utilities, geology)

③ waste oil UST investigations on western site
SEE: NOVA report - good enough?

④ FP management plan
- "saturated soil" = F.P. (field capacity)
- evaluate nuisance issues / landuse changes
- shallow GW use
- deed "restriction" vs. "notification"
• S Chamberlin will contact Bakaldin to see ~~if~~ ~~if~~ deed notification can be pursued
- ~~off-site~~ "impediment" of adj site use

check w/ S.L.
and adjoining sites
contaminated sites archived in S.L. (PLW, Building Dept.)

9/18

M. Bakaldin indicated in conference call w/ S. Chamberlin and me today that City has a "central" computer system which can be "flagged" w/ warning. S. Chamberlin will determine ASNs / street addresses of adjoining sites for this purpose.
