

Polvorosa Business Park

San Leandro

MEMO to file:

3/5/93

I spoke with Mike Stoll of Levine-Fricke today. He called requesting approval to change the well from which the on-site remediation draws. I informed Mr. Stoll that it is not known to me whether or not this is an LOP-eligible site. I do know that it is not one at this time, even if eligible. I explained the LOP transfer/review process with him.

I asked that he address a letter to Rob Weston, referencing today's phone conversation, explaining their planned modification to the remediation system, the reasons for the change, and to go ahead and implement it if, in their professional judgement such a change is necessary to continue appropriate remediation of the site.
