Jim Carmody

Madhulla Lopez

S. Hupp

- 1) Soil-gas survey if conc. are above the ~~saturation~~ ^{saturation} conc.
- 2) Before the end of June - need a letter
- 3) Appropriate depth to groundwater to use
→ some shallow groundwater depth (9 ft)
Others at 25 ft - look at each pathway
→ prior to rise

Soil

Soil-gas sample ^{for} groundwater & soil

Flux → to use in the ASTM-RBCA

Risk Management plan

* Look at the construction worker's scenario
at 5 ft depth - conc. & find the exposure

(Use the ^{Heptamer} ~~as~~ ^{surrogate})

mineral spirits - conc. in soil below the saturation conc. then do the risk assessment

6/19/97 Former Standard Brands
meeting w/:

8270 - new soil

8270 - found in Hall

samples - 2

→ 7/2/97 - Bankruptcy Hearing
→

TDS →

Risk Assess → by middle next week → by 6/18/97
→ 2 weeks ✓
→ letter by June 30, 1997
↳

→ Source

→ preferential pathways →

→ Commercial / Residential scenario

PM by call
1:30

Status - UST

Samples →

→ no building demolition →

→ Product types →

6/9/97

Tomorrow →

discuss the # of samples to collect
for soil/gas surveys. →

commercial scenario

→ soil ingestion not an issue
