**SUBJECT: Proposed Ground Water Sampling
Site Adjacent to 400 Lancaster Street
Oakland**

Dear Mr. Chan:

This is in response to your 24 January 1996 letter and our subsequent phone conversations on 2 February 1996 and 27 February 1996.

As we discussed, Southern Pacific proposes to collect one grab ground water sample coincident with sample location B-1A as documented in the 19 October 1995 Site Investigation Report prepared by Industrial Compliance, Inc. The objective of this work is to determine if any dissolved-phase petroleum hydrocarbons are present in the ground water. In order to remove any free-phase or biogenic materials which may be present, the sample will be prepared using a filtration/silica gel process prior to performing the EPA 8015 analysis. The work is scheduled for next month. Should you have any questions, please give me a call.

Sincerely,

A handwritten signature in cursive script that reads "M Grant".
