REMARKS

Date By

10/23/90 gmsr. Review & call Semco regarding closure plan: need amended workman's comp. certificate and the name & address of the person representing the U.S. Gov.  
P.M. - approve plan  
Talk w/ Chuck at SEMCO and Marcia Bell w/ USVA: tank pull irrevocably scheduled for now 11/7 a.m., and I cannot attend. Instruct Semco to show me.

REMARKS

Date By

11/9 Site inspection - tanks have not yet been removed because of obstacles. Samples to be taken later.

11/27 Phone call from Kent Murray of Angus - contain. more widespread than thought at first; GW appears to be perched, on top of a thick bed of clay.

12/6 Review Angus proposal for soil excavation and prepare letter (12/20) indicating the necessity of performing this work.

REMARKS		REMARKS		REMARKS	
Date		Date	By	Date	By
3/1/92	Review Tank closure/soil removal/remediation report/work plan submitted by Augco. All contaminated soil has been removed, except for a section under the fire station that has 22,000 ppm O & G and 6,500 ppm diesel. This cannot be removed without damaging the fire station. monitoring wells have been installed around former tank pit & 2 (4,000 yds.) to be treated on-site in a bioremediation cell.	4/4/92		Review Augco work plan for subsoil inves. at other <sup>old</sup> tanks & sites at facility. write letter approving work plan.	
		6/2/92	EL	Spoke w/ Scott Parker told him letter is being prepared to ask for TOG + discrepancy in report. TPH-d not test in 3/92 ...	
		9/22/93	EL	Report note that S.S. taken. However tank still in use + want to close in place. Check for tank tightness test; Sent closure form + A+B to J. Robinson of CER	
3/26	prepare letter to USVA indicating to stockpile soil cleanup levels are 50 ppm / 10 ppm for O & G and CH-D, respectively; this requirement may force USVA to haul soil to a landfill rather than bioremediate it.
