Oakland, California 94624

Subject: Site Status Update for ARCO Station 2152, 22141 Center Street, Castro Valley, California.

Dear Mr. Seery:

This letter provides an update on investigation and remedial activities conducted for the above-referenced site. This update covers site activities performed during February 1993, and site activities anticipated for the month of March 1993.

February 1993 Activities

- Performed quarterly groundwater monitoring.
- Completed construction of interim soil remediation system at the site.

Work Anticipated for March 1993

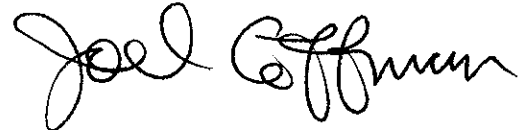

- Continue monthly groundwater monitoring.
- Initiate system testing and start-up of interim soil remediation system at the site. System start-up scheduled for March 15, 1993. System may be down for short time due to recent heavy rains which have caused apparent swelling of clayey materials in subsurface strata resulting in very low vacuum flows from the vapor extraction wells.

Site Status Update
ARCO Station 2152, Castro Valley, California
