Oakland, California 94624

Subject: Site Status Update for ARCO Station 2152, 22141 Center Street, Castro Valley, California.

Dear Mr. Seery:

This letter provides an update on investigation and remedial activities conducted for the above-referenced site. This update covers site activities performed during June, July and August 1993, and site activities anticipated for the month of September 1993.

June, July and August 1993 Activities

- Performed Third Quarter 1993 groundwater sampling.
- Submitted Second Quarter 1993 Quarterly Groundwater Monitoring and Remediation Performance Evaluation to ARCO and regulatory agencies.
- Restarted and shut down the interim remediation system at the site during each of the three above months. The VES was initially shut down in February 1993 due to rain-soaked soils preventing air flow into the system.

Work Anticipated for September 1993

- Continue restarting the VES to determine if sufficient air flow is present to operate the remediation system.

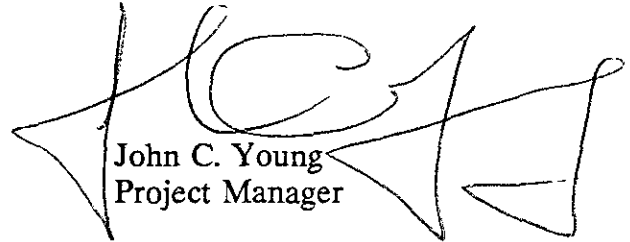

Site Status Update
