

6/3/91 Called to leave message with Judy Peters. I received a call last week from E+E. They've received a work assignment from EPA regarding ANCC. It's apparently listed on CERCLIS. I told Celia^{of E+E.} that DHS + RWQCB may have all the information. I told her our fees for site search, and said I would see if they were waived for other government agencies. I called Judy to find out what's been going on, and to push for a report on the sampling activities.

I then called Celia Shine of E+E to recommend that she call Don Cox of Region 2 DHS to invite him on-site for the walk through. Celia said the walk through is ~~currently~~ tentatively scheduled for June 19th at 1:30 p.m. Judy was not in. She will not be in until June 16th.

5/2/91

Spoke w/ Ed Aluonw regarding analyses results from installation of new wells.

Ed said they have some preliminary soil sample results back, and will probably have water samples back in the next week or so. I figure I won't see anything for another 2-4 weeks. Told Ed that I would be interested in getting some sample results back so that I could present them to DHS.

~~Ed~~ Ed asked about the site across the street (Uuocal) told him that was under CAD from RWQCB, and that they were also interested in what was going on.

Ed said they are still pulling some free product from GW 1. Well is screened below current water table (due to rains?). GW 6 is showing free product in hundredths of feet. Ed is puzzled about the one time occurrence of feet of floating product.

They will be on-site May 13, 14, 15, and invited me out to check out what they were doing.
