21000 Wilbeam
Castro Valley

8/23/94

MEMO to file:

Andy Mork (CDM) called today at the request of BART. Apparently the BART station's construction is slated to move in the direction where the wells are presently located. He wanted to clarify a previous statement regarding the need to continue GW sampling pending case review leading to case closure. I said the wells need not be sampled during this process. He said BART would like to decommission the wells at this time to facilitate site development. I agreed ~~to~~ to allowing this with the caveat that they may need to replace them should, following review of the case history, it be determined case closure is not yet appropriate and/or well placement was inappropriate. The cards, I said, were in BART's lap, with respect to this decision of destroying the wells at this time.

MEMO to file:

I spoke today with George Chiu of BART. I inquired into the whereabouts of the final UST closure report for this site. The USTs were closed back in June 1992 and no report has yet been received, now 6 mos. later. I informed Mr. Chiu that such reports are due for submittal w/in 60 days of closure. He indicated that he hadn't yet received a report from James & Moore (J+M). I told him that I had already left a message with J+M's Erik Skow, the project manager for the closure activities. Mr. Chiu said he would contact Mr. Skow to ascertain the report's status.
