Data for 11/12/91 monitoring indicates NW Flow.

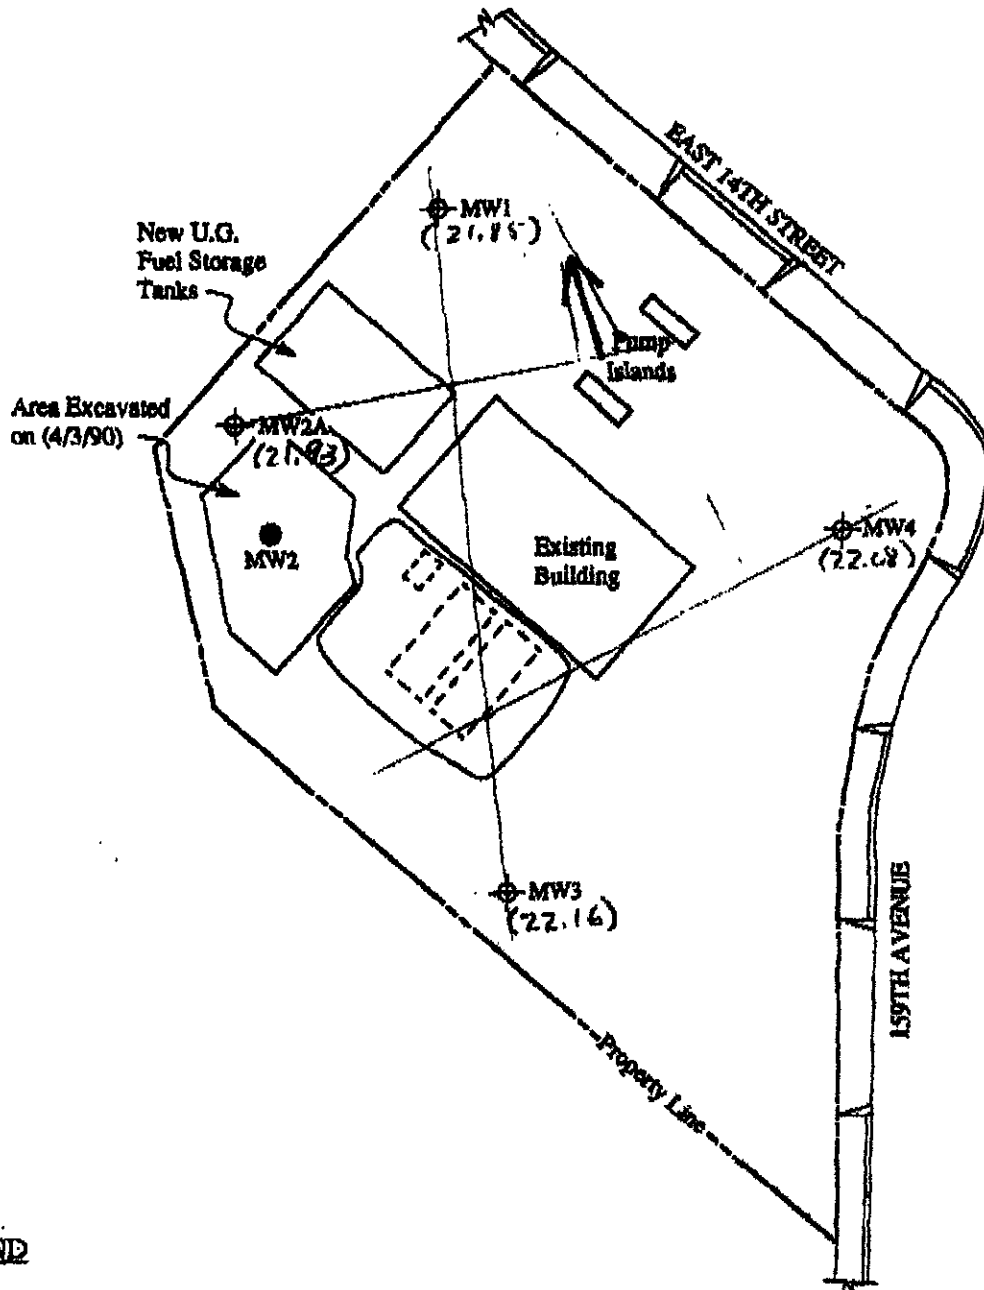

We plan to do a site reconnaissance ± late review - to look for upgradient source of 8010 constituents as well as other contamination. File review of 12/91 was inconclusive.

We have discussed the progress of obtaining offsite access for well installation with Penny Sitzer (Unocal). We would welcome your assistance. I have included the landowner information. Let me know, if anything further is required.
