RE: Former Exxon RAS #7-0234/3450 35th Avenue, Oakland, California.

Dear Ms. Hugo:

Attached for your review and comment is a letter report entitled ***Groundwater Monitoring Well Destruction***, dated October 30, 2000, for the above referenced site. The report was prepared by Environmental Resolutions, Inc. (ERI) of Novato, California, and documents the destruction of three groundwater monitoring wells at the subject site.

If you have any questions or comments, please contact me at (925) 246-8768.

Sincerely,

Darin L. Rouse
Senior Engineer

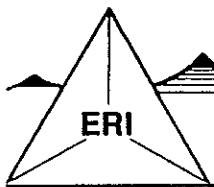

Attachment: ERI's Groundwater Monitoring Well Destruction, dated October 30, 2000.

Concord, California 94524-4032

Subject: Groundwater Monitoring Well Destruction at Former Exxon Service Station 7-0234,
3450 35th Avenue, Oakland, California.

Mr. Rouse:

At the request of ExxonMobil Refining and Supply (formerly known as Exxon Company, U.S.A.) (ExxonMobil), Environmental Resolutions, Inc. (ERI) performs environmental activities at the subject site. This letter documents the destruction of three groundwater monitoring wells (MW1 through MW3) at the subject site. The location of the site is shown on the Site Vicinity Map (Plate 1). The locations of the destroyed wells are shown on the Generalized Site Plan (Plate 2).

ERI performed the field work in accordance with the well destruction permits issued by the Alameda County Public Works Agency, dated July 18, 2000 (Attachment A), and a site-specific Health and Safety Plan. Well construction logs are included as Attachment B.

On August 11, 2000, ERI observed Woodward Drilling Company, Inc. (Woodward) of Rio Vista, California, destroy the groundwater monitoring wells. ERI measured and recorded the total depth of the wells. The results of the well sounding are presented in Table 1. The wells were destroyed by drilling out the top two feet of casing, filter pack, and grout seal. The remaining casing was pressure-grouted with a cement-bentonite slurry from the total depth to two feet immediately below ground surface (bgs). The borehole was filled with concrete from two feet bgs to the ground surface.

Soil generated during the well destruction was collected, covered with visqueen, and stored on site. ERI collected a composite sample from the stockpiled soil and submitted the sample to Southern Petroleum Laboratories (SPL) for analysis of total extractable petroleum hydrocarbons as diesel (TEPHd), total purgeable petroleum hydrocarbons as gasoline (TPPHg), benzene, toluene, ethylbenzene, and total xylenes (BTEX), total lead, and halogenated volatile organic compounds (HVOCs) using the methods listed in Table 2. The laboratory analysis report and Chain of Custody record are attached (Attachment C). The analytical laboratory results are presented in Table 2.

On September 25, 2000, Dillard Environmental Services (Dillard) of Byron, California, (under direct contract to ExxonMobil) transported approximately 0.5 tons of soil generated during the well destruction to the Republic-Vasco landfill in Livermore, California. Soil disposal documentation is included as Attachment D.

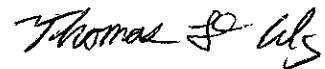

October 30, 2000

PERMIT CONDITIONS Circled Permit Requirements Apply

A. GENERAL

1. A permit application should be submitted so as to arrive at the ACPWA office five days prior to proposed starting date.
2. Submit to ACPWA within 60 days after completion of permitted work the original Department of Water Resources- Well Completion Report.
3. Permit is void if project not begun within 90 days of approval date.

B. WATER SUPPLY WELLS

1. Minimum surface seal thickness is two inches of cement grout placed by tremie.
2. Minimum seal depth is 50 feet for municipal and industrial wells or 20 feet for domestic and irrigation wells unless a lesser depth is specially approved.

C. GROUNDWATER MONITORING WELLS

INCLUDING PIEZOMETERS

1. Minimum surface seal thickness is two inches of cement grout placed by tremie.
2. Minimum seal depth for monitoring wells is the maximum depth practicable or 20 feet.

D. GEOTECHNICAL

Backfill bore hole by tremie with cement grout or cement grout/sand mixture. Upper two-three feet replaced in kind or with compacted cuttings.

E. CATHODIC

Fill hole above anode zone with concrete placed by tremie.

F. WELL DESTRUCTION

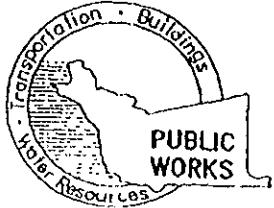

Send a map of work site. A separate permit is required for wells deeper than 45 feet.

RE: EXXON #7-0234
3450 35th Street
Oakland, California

Dear Mr. Chappell:

Please be advised that the .5 tons of petroleum contaminated soils from the referenced site has been removed. The soil was transported for disposal to Republic-Vasco Landfill in Livermore, CA on September 25, 2000.

Should you have any questions, please do not hesitate to call.

Sincerely,

Dillard Trucking, Inc. dba,
DILLARD ENVIRONMENTAL SERVICES

DISPOSAL RECEIPT FORM FOR HAZARDOUS WASTE			
DATE:	Thursday, September 21, 2000		
EXXON #:	exxon #7-0234		
DISPONER:	3450 35th st	OAKLAND	CA
DISPONER:	03726		
DISPONER:	dillard exxon		
DISPONER:	9/21/00		
DISPONER:	9/21/01		
DISPONER:	soil		
DISPONER:	ADC		

The above is a recommendation of the Vasco Road Landfill. It must be understood that management of the waste for disposal must be in compliance with the facility's permit and applicable federal, state and local regulations. This proposal is based upon a review of the information provided by the generator and is contingent upon the receipt at the disposal facility of a waste material essentially equivalent in chemical composition and physical properties (within as defined above).

At The Request of Exxon Mobil

A MINIMUM OF ONE SIGNED AND COMPLETED COPY OF THIS FORM MUST ACCOMPANY EACH LOAD. ONE COPY WILL BE RETAINED BY THE VASCO ROAD LANDFILL.

JAMES OREGGIO
