---

Hello James:

Alameda County Environmental Health (ACEH) staff has reviewed the case file including the November 8, 2013 *Site Conceptual Model Update and Soil and Groundwater Investigation Report (Report)* and the April 16, 2014 *Addendum to the Site Conceptual Model Update and Soil and Groundwater Investigation Report (Work Plan)* prepared on your behalf by CH2MHill for the subject site. Thank you for submitting the reports. The Work Plan proposes the installation of twenty direct-push borings to collect soil and groundwater samples and the installation of five groundwater monitoring wells.

We conditionally concur with the proposed work, but prior to issuing authorization to proceed, ACEH would like to invite you to a meeting at our office to discuss the proposed work and the most efficient path towards closure. By next Friday 6/20/2014, please send me a list of five dates and times for a meeting no sooner than July 7, 2014.

Thank you,

Karel Detterman, PG
