Re: Larkin v. Desert Petroleum, et al.

Dear Mr. Seto:

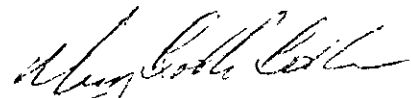

Enclosed for your review please find the draft Declaration of Larry Seto; Exhibit A - May 1990 Exceltech Summary Report; and the transcript for the deposition of Larry Seto. Please return the Exhibit A Summary Report and the deposition transcript to Robert F. Campbell after your review.

Please do not hesitate to contact me with any questions or comments.

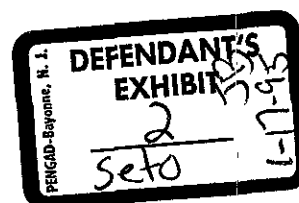

Very truly yours,

FITZGERALD, ABBOTT & BEARDSLEY

Re: 1628 Webster Street
Alameda, CA

Dear Ms. Larkin:

In the latter part of February of this year we removed the underground storage tanks at the above-referenced service station location.

As required by state regulations, samples of the soil under each tank were taken and analyzed for contamination. The sample results were then forwarded to the Alameda Fire Department and the Alameda County Environmental Health Department. Enclosed for your records is a copy of the laboratory report on the samples.

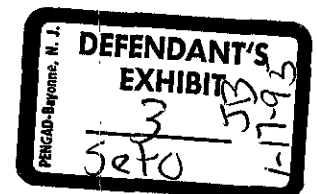

One sample was taken from each tank area. The sample readings are expressed in hydrocarbon parts per million (mg/kg). Although there is not an established criterion for these numbers it is generally accepted that parts per million under 100 is below a contamination level. As you will note the laboratory numbers from the tests are well below that level.

If you require any further explanation please feel free to contact the undersigned.

Very truly yours,

J. D. Rutherford
Manager, Marketing Services
