RE: 1628 Webster St., Alameda

Mr. Gilkuly stated that the investigations to be conducted in April '93 are for the sole purpose of determining a settlement equivalent to clean-up costs for anticipated

the site. This information from the investigation will not be disclosed to the plaintiffs.

I told him that if these investigations are solely for determining a settlement, then the County would not be involved. However, I warned that if it is determined that investigations were not adequate to evaluate the whole extent of contamination problem at the site =>

Then additional investigations
would be required by the County
at a later date.

Phone Conversation 4/12/93

Robert Campbell, Attorney for Mr. Larkin
(510) 451-3300

& Juliet Shin

RE: 1628 Webster St., Alameda

Mr. Campbell stated that Mr. Larkin is in the process of suing a number of different petroleum companies that operated at the site in the past. All the soil has been excavated to the property lines & backfilled w/ clean soil.

The various oil companies have agreed to work together in the meantime to conduct investigations at the site. Mr. Campbell believes that work should begin by sometime in May '93. The contact person for these oil companies is:
Morgan Gilhuly, attorney
McCutchen & Doyle →
(510) 937-8000.

I spoke to Mr. Campbell again. 4/13/93
He stated that he had spoken to
Mr. Githely and found out that
they would be conducting hydroponics
out at the site to collect soil &
groundwater samples to determine
the severity of contamination at
the site. Soil samples will also be
collected from the stockpiled soil.
This investigation will be used
to estimate clean-up costs to
determine a settlement fee that
Mr. Githely can offer to Mr. Larkin.
