RE: Plants Unlimited

I returned John's call to let him know that at least 3 more quarters of monitoring would be required. I also mentioned that an employee of Plants Unlimited mentioned that a water well was used on site. John claimed that it was only a standby well and hadn't been used in ~2 years. I told him that if he had other options that he probably shouldn't use this well while investigations were being conducted at his site. If he chose to continue use of this well, he would have to inform this office + have this pumping into consideration when determining various gradients & he would probably have to sample ^{water} well

From: Paul Studemeister
to: Juliet Skir

Ms. Skir stated that there must have been some sort of misunderstanding because the recently submitted work plan stated that ground water samples will be collected monthly for the 1st 3 months & then quarterly thereafter. However, only quarterly groundwater sampling is required and monthly water level measurements.
