Duration: 0 hours

Received a voice mail early this morning from Chuck Dittmar of ARCADIS regarding the GM Truck facility- RO1389. He said he found additional reports and wished to discuss them. I returned his call and left a voicemail saying he should upload the documents to the ACEH website and include an email to me listing the reports. I would review the documents and return his call. I mentioned I would be in all-day meetings these next two days but may have opportunities to check VM and email.
