Duration: 5 minutes

Returned a call from Mr. Charles Dittmar of ARCADIS re the GM truck facility- RO1389. He asked if there was anything he could do to move the case forward while ACEH was performing the case file review. I mentioned that for consistency, we use a data gap identification tool - our DGIT- to assist in identifying the case status. I said it was based on the California LUFT manual with an eye toward completing the LTCP checklist. He was interested in it so I said I would provide him a copy. I sent it shortly after the call ended.
