Scott Co.  
Oakland 94607

Talked to Jim Fike re: QMR -  
submit results: will  
review the ~~data~~ data by send a letter  
for him Non attainment Area -  
policy (510) 551-7776

5/27/93

STIP 3602

Scott Company

Talked Jim Reibi:

- notice to Planning Dept re:  
known contamination at the street
- need full characterization of soils &  
groundwater contamination (WP for town)
- continue quarterly monitoring
- no groundwater remediation at this time

Scott Co.

11/1/93

Talked to Jim Dribi, re: reports of soil storage<sup>4</sup>  
- will be submitted <sup>within</sup> 1-2 wks.  
- result highest 300 ppm at 11 ft - 2 ft above  
groundwater  
5 MW's at site - NP 1st time sampling  
1 MW well near dispenser: low level of He

Preyhound used the tank to store kerosene before  
Scott's time.

↳ used to store gas of TPH's.

This round of sampling Toluenes was present  
in the all the samples due to tubing used  
in collecting sample.

False positive Toluenes - due to instrument  
used for sample collection

11/12/92

STIP 3602

1919 Market Street Oakland #607  
Talked to Jim Ginski re: Site status  
installed 5 MW's

Soil contamination found  $< 1000$  ppm TPH  
(more likely Kepone) in 2 wells near the  
former tank locations.

3 down gradient wells 13 ft deep.

MW 4: free product 2, BPP and TPH<sub>2</sub>  
near the dispenser left of soil

tanks removed 10 years ago.

Site sold to City of Oakland  
for \$34 Millions by South  
Bayview a property in San Leandro  
for #4414

7/29/92

phone with Jim Birsi (Century West  
Consultant)

re: update on site activity

2 on site wells installed 7/23/92.

3 off site wells to be installed thru. 7/30/92.

Seate Co. will be responsible for clean-up  
City of Oakland purchased the property.
