 FAX: (510) 420-9170

As you requested during our telephone conversation today, enclosed is a copy of the revised Proposed Boring Location map for the site referenced above. The revised boring location is approximately 15 feet west of the previous dispenser sample location. We do not foresee encountering product piping or utilities at this location. However, due to the proximity of the boring location to the product piping and underground storage tanks, we will relocate this boring to the previous proposed location north of the dispenser island if we encounter any obstructions in the new proposed boring location.
