Bob,

I did not realize there were two cases on Geotracker. At some time in the past, it appears someone at the Water Board opened a case and ACEH also opened a case. One of the Geotracker cases is a duplicate and will need to be deleted. You do not need to upload anything else at this point.

I will try to resolve the Geotracker issues and get the global ID consistent with our case files but it will take me some time as I do not have authorization to delete a case.

Regards,

Jerry,

We were not aware that a new file was opened.

At the moment I don't have access to upload to the Cruise America File on GeoTracker. Shouldn't this all be one file. If not are both cases going to be closed? Pete has concerns about the data base showing the McGuire-Hester case shown as an unresolved.

I've uploaded all the investigation work plans and reports. We don't seem to have electronic copies (PDFs) of the quarterly reports except for the one's I've downloaded from your webs site.
