Re: No Further Action at 2144 Alvarado Street, San Leandro, CA

Dear Mr. and Mrs. Coffel:

Environmental assessment reports prepared for 2144 Alvarado Street in San Leandro, California, were reviewed to determine if further action is required at the site. Reports reviewed include:

- Stellar Environmental Solutions' January 1999 *Phase II Environmental Site Investigation*
- Stellar Environmental Solutions' September 1999 *Soil Remediation Report*
- Stellar Environmental Solutions' July 2000 *Residual Risk Management Plan*
- *Addendum to Residual Risk Management Plan*, dated March 28, 2001

In October and December 1998, shallow soil samples collected from the site identified elevated levels of organochlorine pesticides in four locations (Area A through Area D). In July and August 1999, the four areas were excavated (to a maximum depth of 3 feet below ground surface (bgs)) to the extent possible to removed pesticide-impacted soil. Confirmation soil samples were collected to determine if soil removal was effective in reducing the levels of contaminants to below the U.S. EPA's Preliminary Remediation Goals (PRGs) for residential use, the desired cleanup goal. Two areas (Area B and Area D) contained chlordane and/or heptachlor above the PRGs for residential use. However, the levels detected in the four areas were below the PRGs for commercial use.

Groundwater at the site was first encountered at approximately 20 feet bgs. Only one grab groundwater sample has been collected at the site, from a borehole advanced through Area D, where the highest detected soil contamination was identified. No organochlorine pesticides were detected above the laboratory detection limits. It is unlikely that residual pesticides in soil would migrate vertically to impact groundwater at 20 feet bgs.

Impacted soil is currently beneath an intact cap. A residual risk management plan (RMP) and an addendum to the RMP (to address any metals and PCBs) were submitted that adequately addressed soil management and human health risk considerations in the event of future site development where the cap may be removed. Notification to future property owner(s) of the potential health risks associated with residual pesticide-impacted

M/M. Coffel
RE: No Further Action at 2144 Alvarado, San Leandro, CA
March 28, 2001
Page 2 of 2

soil as documented in the above referenced reports is through a deed restriction as recorded with the Alameda County Recorder Office on February 20, 2001.

Based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the surface contamination by organochlorine pesticides is required by Alameda County Environmental Protection.

If you have any further questions concerning this matter, please contact Ms. eva chu at (510) 567-6762.

Sincerely,

Mee Ling Tung, Director
Environmental Protection

RE: NFA Concurrence for 2144 Alvarado Street, San Leandro, CA

Dear Mr. Brewer:

I have completed reviewed the case file for the above referenced site and have determined that no further action related to the surface contamination by organochlorine pesticides is required by Alameda County Environmental Protection.

Shallow soil samples collected from the site identified elevated levels of organochlorine pesticides in four locations. The four areas were subsequently excavated (to a maximum depth of 3 feet below ground surface (bgs)) to the extent possible to removed pesticide-impacted soil. Confirmation soil samples were collected to determine if soil removal was effective in reducing the levels of contaminants to below the U.S. EPA's Preliminary Remediation Goals (PRGs) for residential use, the desired cleanup goal. Two areas contained chlordane and/or heptachlor above the PRGs for residential use. However, the levels detected in the four areas were below the PRGs for commercial use.

Impacted soil is currently beneath an intact cap. A risk management plan (RMP) was submitted that adequately addressed soil management and human health risk considerations in the event of future site development where the cap may be removed. Notification to future property owners of the potential health risks associated with residual pesticide-impacted soil is through a deed restriction as recorded with the Alameda County Recorder Office on February 20, 2001.

Groundwater at the site was first encountered at approximately 20 feet bgs. Only one grab groundwater sample has been collected at the site, from a borehole advanced through an area where the highest detected soil contamination was identified. No organochlorine pesticides were detected above the laboratory detection limits. Shallow lithology consists of predominantly silts and clays, interbedded with thin, fine-grained sand lenses. It is unlikely that residual pesticides in soil would migrate vertically to adversely impact groundwater quality beneath the site.

This office is requesting RWQCB's concurrence that no further action is warranted at the above referenced site. If you have any questions, I can be reached at (510) 567-6762.

File No. 2198.08 (RDB)

Mr. Donald Coffel
Mrs. Beth Coffel
7921 Bayberry Dr
Alexandria, VA 22306-3214.

SUBJECT: No Further Action, 2144 Alvarado Street, San Leandro, Alameda County

Dear Mr. and Mrs. Coffel:

This letter confirms the completion of site investigation and remedial action for pesticide releases at the subject site and concurs that residual impacts at the site do not pose a significant threat to groundwater or surface water.

The subject property is located at 2144 Alvarado Street in San Leandro. The depth to groundwater beneath the site is approximately 20 feet. The site was previously used to prepare pesticides for use by a small extermination business. The pesticide chlordane was detected in shallow soils at concentrations up to 110 mg/kg. This significantly exceeded U.S. Environmental Protection Agency "Preliminary Remediation Goals" (PRGs, adjusted to California EPA-specific toxicity factors) for residential land use (0.47 mg/kg) and commercial/industrial land use (3.1 mg/kg). The pesticide heptachlor was also detected at elevated levels in shallow soils.

Where accessible, impacted soil was excavated and disposed of offsite. Residual concentrations of up to 6.3 mg/kg chlordane were reported for soil left in place at the site. Impacted soil that exceeded residential and commercial/industrial PRGs and could not be easily removed was capped beneath asphalt or concrete paving or is located under existing buildings.

In order to address these remaining impacts, a risk management plan and a covenant to the deed were prepared. These documents require that areas of impacted soils remain capped and that impacted soils be properly managed and disposed of should they be exposed during future site development activities. The Alameda County Health Care Services Agency reviewed and approved the documents.

The identified pesticides are relatively immobile in the subsurface and are not likely to cause adverse impacts to groundwater at the reported concentrations. No pesticides were detected in a grab sample of groundwater collected at the site. No surface water bodies are located in the immediate vicinity of the property.

California Environmental Protection Agency

Mr. Donald Coffel
Mrs. Beth Coffel

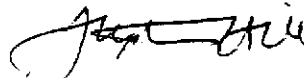

2

In a letter to our office dated February 28, 2001, the Alameda County Health Care Services Agency recommended that the case be closed under the conditions stated in the risk management plan and covenant to the deed. Based upon the provision that the information provided to this agency was accurate and representative of site conditions, I concur that no further action is required at the site with respect to potential groundwater and surface water quality issues overseen by this agency.

Please contact Roger Brewer of my staff at (510) 622-2374 if you have any additional questions [e-mail rdb@rb2.swrcb.ca.gov].

NORTH AMERICAN TITLE CO., INC.

COVENANT AND ENVIRONMENTAL RESTRICTION ON PROPERTY

2144 Alvarado Street

San Leandro, CA

This Covenant of Environmental Restriction on Property (the "Covenant") is made as of the 14 day of February, 2001, by Beth and Donald Coffel ("Covenantor"), who are the owners of record of that certain real property situated at 2144 Alvarado Street in the City of San Leandro, County of Alameda, State of California which is more particularly described in Exhibit A attached hereto and incorporated herein by this reference (such property hereinafter referred to as the "Burdened Property"), for the benefit of the Alameda County Health Care Services Agency (the "Agency"), with reference to the following fact.

A. The Burdened Property contains hazardous materials

B. Contamination of the Burdened Property. Soil at the Burdened Property was contaminated by the Burdened Property's historical use by pesticide companies which have operated on the Back Portion of the property for the storage and handling of pesticide-containing materials. These operations resulted in the contamination of soil with organic chemicals including chlordane, which constitute hazardous materials as that term is defined in Health & Safety Code Section 25260.

C. Exposure Pathways. The residual contaminants addressed in this Covenant are present in the soil on the Burdened Property. Without the mitigation measures which have been performed on the Burdened Property, exposure to these contaminants could take place via in-place contact resulting in dermal contact, ingestion of contaminated soil and inhalation of fugitive dust with adsorbed contaminant particles. The risk of public exposure to the contaminants has been substantially lessened by the remediation and controls described herein.

D. Adjacent Land Uses and Population Potentially Affected. The Burdened Property is currently zoned light industrial and used for pest control operations and for residential and office use and is adjacent to industrial, commercial and some residential land uses.

E. Full and voluntary disclosure to the Agency of the presence of hazardous materials on the Burdened Property has been made and extensive sampling of the Burdened Property has been conducted. The Burdened Property has been the subject of an Agency approved soil removal project to remove the highest known concentrations of pesticide-containing soil. Residual pesticides at low concentrations remain at the Burdened Property.

F. The residual pesticide levels which remain in the soil at the Back Portion of the Burdened Property behind the residence/office pose no threat to the human health or the environment, provided that the use of the Back Portion of the property remains nonresidential and the Risk Management Plan (RMP) prepared for the Owner and required and approved by the Agency is followed in the event of any excavation or redevelopment of the site.

G. Copies of reports documenting environmental conditions at this site and a copy of the RMP may be found at the Environmental Health Services Division of the Alameda County Health Care Services Agency at 131 Harbor Bay Parkway, Suite 250, Alameda, California 94502-6577, and/or at the City of San Leandro, Environmental Services, 835 East 14th Street, San Leandro, California 94577.

H. Covenantor desires and intends that in order to benefit the Agency, and to protect the present and future public health and safety, the Burdened Property shall be used in such a manner as to avoid potential harm to persons or property that may result from hazardous materials that may have been deposited on portions of the Burdened Property.

ARTICLE I GENERAL PROVISIONS

1.1 Provisions to Run with the Land. This Covenant sets forth protective provisions, covenants, conditions and restrictions (collectively referred to as "Restrictions") upon and subject to which the Burdened Property and every portion thereof shall be improved, held, used, occupied, leased, sold, hypothecated, encumbered, and/or conveyed. The restrictions set forth in Article III are reasonably necessary to protect present and future human health and safety or the environment as a result of the presence on the land of hazardous materials. Each and all of the Restrictions shall run with the land, and pass with each and every portion of the Burdened Property, and shall apply to, inure to the benefit of, and bind the respective successors in interest thereof, for the benefit of the Agency and all Owners and Occupants. Each and all of the Restrictions are imposed upon the entire Burdened Property unless expressly stated as applicable to a specific portion of the Burdened Property. Each and all of the Restrictions run with the land pursuant to section 1471 of the Civil Code. Each and all of the Restrictions are enforceable by the Agency.

1.2 Concurrence of Owners and Lessees Presumed. All purchasers, lessees, or possessors of any portion of the Burdened Property shall be deemed by their purchase, leasing, or possession of such Burdened Property, to be in accord with the foregoing and to agree for and

among themselves, their heirs, successors, and assignees, and the agents, employees, and lessees of such owners, heirs, successors, and assignees, that the Restrictions as herein established must be adhered to for the benefit of the Agency and the Owners and Occupants of the Burdened Property and that the interest of the Owners and Occupants of the Burdened Property shall be subject to the Restrictions contained herein.

1.3 Incorporation into Deeds and Leases. Covenantor desires and covenants that the Restrictions set out herein shall be incorporated in and attached to each and all deeds and leases of any portion of the Burdened Property. Recordation of this Covenant shall be deemed binding on all successors, assigns, and lessees, regardless of whether a copy of this Covenant and Agreement has been attached to or incorporated into any given deed or lease.

1.4 Purpose. It is the purpose of this instrument to convey to the Agency real property rights, which will run with the land, to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

ARTICLE II DEFINITIONS

2.1 Agency. "Agency" shall mean the Alameda County Health Care Services Agency and shall include its successor agencies, if any.

2.2 Back Portion. "Back Portion" shall mean that portion of the Burdened Property identified as such on Exhibit B attached hereto and incorporated herein by this reference.

2.3 Improvements. "Improvements" shall mean all buildings, roads, driveways, regradings, and paved parking areas, constructed or placed upon any portion of the Burdened Property.

2.4 Occupants. "Occupants" shall mean Owners and those persons entitled by ownership, leasehold, or other legal relationship to the exclusive right to use and/or occupy all or any portion of the Burdened Property.

2.5 Owner or Owners. "Owner" or "Owners" shall mean the Covenantor and/or its successors in interest, who hold title to all or any portion of the Burdened Property.

ARTICLE III DEVELOPMENT, USE AND CONVEYANCE OF THE BURDENED PROPERTY

3.1 Restrictions on Development and Use. Covenantor promises to restrict the use of the Burdened Property as follows:

(a) Development of the Back Portion of the Burdened Property shall be restricted to industrial, commercial or office space;

(b) No residence for human habitation shall be permitted on the Back Portion of the Burdened Property;

(c) No hospitals shall be permitted on the Burdened Property;

(d) No schools for persons under 21 years of age shall be permitted on the Burdened Property;

(e) No day care centers for children or day care centers for Senior Citizens shall be permitted on the Burdened Property;

(f) No Owners or Occupants of the Burdened Property or any portion thereof shall conduct any excavation work on the Back Portion of the Burdened Property, unless expressly permitted in writing by the Agency. Any contaminated soils brought to the surface by grading, excavation, trenching, or backfilling shall be managed by Covenantor or his agent in accordance with all applicable provisions of local, state and federal law;

(g) All uses and development of the Burdened Property shall be consistent with any applicable Risk Management Plan, each of which is hereby incorporated by reference including future amendments thereto. All uses and development shall preserve the integrity of any cap, any remedial measures taken or remedial equipment installed, and any groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the Agency, unless otherwise expressly permitted in writing by the Agency.

(h) No Owners or Occupants of the Burdened Property or any portion thereof shall drill, bore, otherwise construct, or use a well for the purpose of extracting water for any use, including but not limited to, domestic, potable, or industrial uses, unless expressly permitted in writing by the Agency.

(i) The Owner shall notify the Agency of each of the following: (1) The type, cause, location and date of any disturbance to any cap, any remedial measures taken or remedial equipment installed, and of the groundwater monitoring system installed on the Burdened Property pursuant to the requirements of the Agency, if any, which could affect the ability of such cap or remedial measures, remedial equipment, or monitoring system to perform their respective functions and (2) the type and date of repair of such disturbance. Notification to the Agency shall be made by registered mail within ten (10) working days of both the discovery of such disturbance and the completion of repairs;

(j) The Covenantor agrees that the Agency, and/or any persons acting pursuant to Agency orders, shall have reasonable access to the Burdened Property for the purposes of inspection, surveillance, maintenance, or monitoring, as provided for in Division 7 of the Water Code.

(k) No Owner or Occupant of the Burdened Property shall act in any manner that will aggravate or contribute to the existing environmental conditions of the Burdened Property. All use and development of the Burdened Property shall preserve the integrity of any capped areas.

(l) Owner hereby covenants that the use of the Back Portion of the Property behind the residence/front office structure shall be restricted to nonresidential uses. Any attempt to redevelop or utilize this portion of the Property for other purposes, can be done only pursuant to written request and approval by the Agency. Nothing herein shall prohibit the continued use of the area on which the residence/front office structure is located for residential purposes to the extent permitted by the applicable zoning.

(m) No significant excavation of the Back Portion of the Property shall occur, except in compliance with the RMP.

3.2 Except as stated in paragraph 3.1 herein, there are no restrictions regarding use of the Property for commercial purposes.

3.3 **Enforcement.** Failure of an Owner or Occupant to comply with any of the restrictions, as set forth in paragraph 3.1, shall be grounds for the Agency, by reason of this Covenant, to have the authority to require that the Owner modify or remove any Improvements constructed in violation of that paragraph. Violation of the Covenant shall be grounds for the Agency to file civil actions against the Owner as provided by law.

3.4 **Notice in Agreements.** After the date of recordation hereof, all Owners and Occupants shall execute a written instrument which shall accompany all purchase agreements or leases relating to the property. Any such instrument shall contain the following statement:

The land described herein contains residual levels of hazardous materials in soils, and is subject to a deed restriction dated as of February 14, 2001, and recorded on _____, 2001, in the Official Records of Alameda County, California, as Document No. _____, which Covenant and Restriction imposes certain covenants, conditions, and restrictions on usage of the property described herein. This statement is not a declaration that a hazard exists.

ARTICLE IV VARIANCE AND TERMINATION

4.1 **Variance.** Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or any portion thereof may apply to the County for a written variance from the provisions of this Covenant.

4.2 **Termination.** Any Owner or, with the Owner's consent, any Occupant of the Burdened Property or a portion thereof may apply to the County for a termination of the Restrictions as they apply to all or any portion of the Burdened Property.

4.3 **Term.** Unless terminated in accordance with paragraph 4.2 above, by law or otherwise, this Covenant shall continue in effect in perpetuity.

**ARTICLE V
MISCELLANEOUS**

5.1 No Dedication Intended. Nothing set forth herein shall be construed to be a gift or dedication, or offer of a gift or dedication, of the Burdened Property or any portion thereof to the general public.

5.2 Notices. Whenever any person gives or serves any notice, demand, or other communication with respect to this Covenant, each such notice, demand, or other communication shall be in writing and shall be deemed effective (1) when delivered, if personally delivered to the person being served or official of a government agency being served, or (2) three (3) business days after deposit in the mail if mailed by United States mail, postage paid certified, return receipt requested:

5.3 Partial Invalidity. If any portion of the Restrictions or terms set forth herein is determined to be invalid for any reason, the remaining portion shall remain in full force and effect as if such portion had not been included herein.

5.4 Article Headings. Headings at the beginning of each numbered article of this Covenant are solely for the convenience of the parties and are not a part of the Covenant.

5.5 Recordation. This instrument shall be executed by the Covenantor. This instrument shall be recorded by the Covenantor in the County of Alameda within ten (10) days of the date of execution.

5.6 References. All references to Code sections include successor provisions.

5.7 Construction. Any general rule of construction to the contrary notwithstanding, this instrument shall be liberally construed in favor of the Covenant to effect the purpose of this instrument and the policy and purpose of the Water Code. If any provision of this instrument is

found to be ambiguous, an interpretation consistent with the purpose of this instrument that would render the provision valid shall be favored over any interpretation that would render it invalid.
