Subject: Amendment and Attachment to the Remedial Investigation Report for the
Corporation at 5035 and 5045 Bristol Court, Mountain View, California

Dear Madhulla,

Attached is a revised page 8 of the report we faxed last week. In table VI of the report (SW40 and SW41, two blank samples, were listed as having 10,000 ug/wipe and 18,000 ug/wipe, but were actually non-detect blanks). Also attached are two maps showing the locations where the samples were collected. One map shows where sample data exceeded cleanup goals prior to cleaning, and the other shows sample data meeting cleanup criteria before and after cleaning.

Please call me if you have any questions, comments, or revisions.

Respectfully yours,

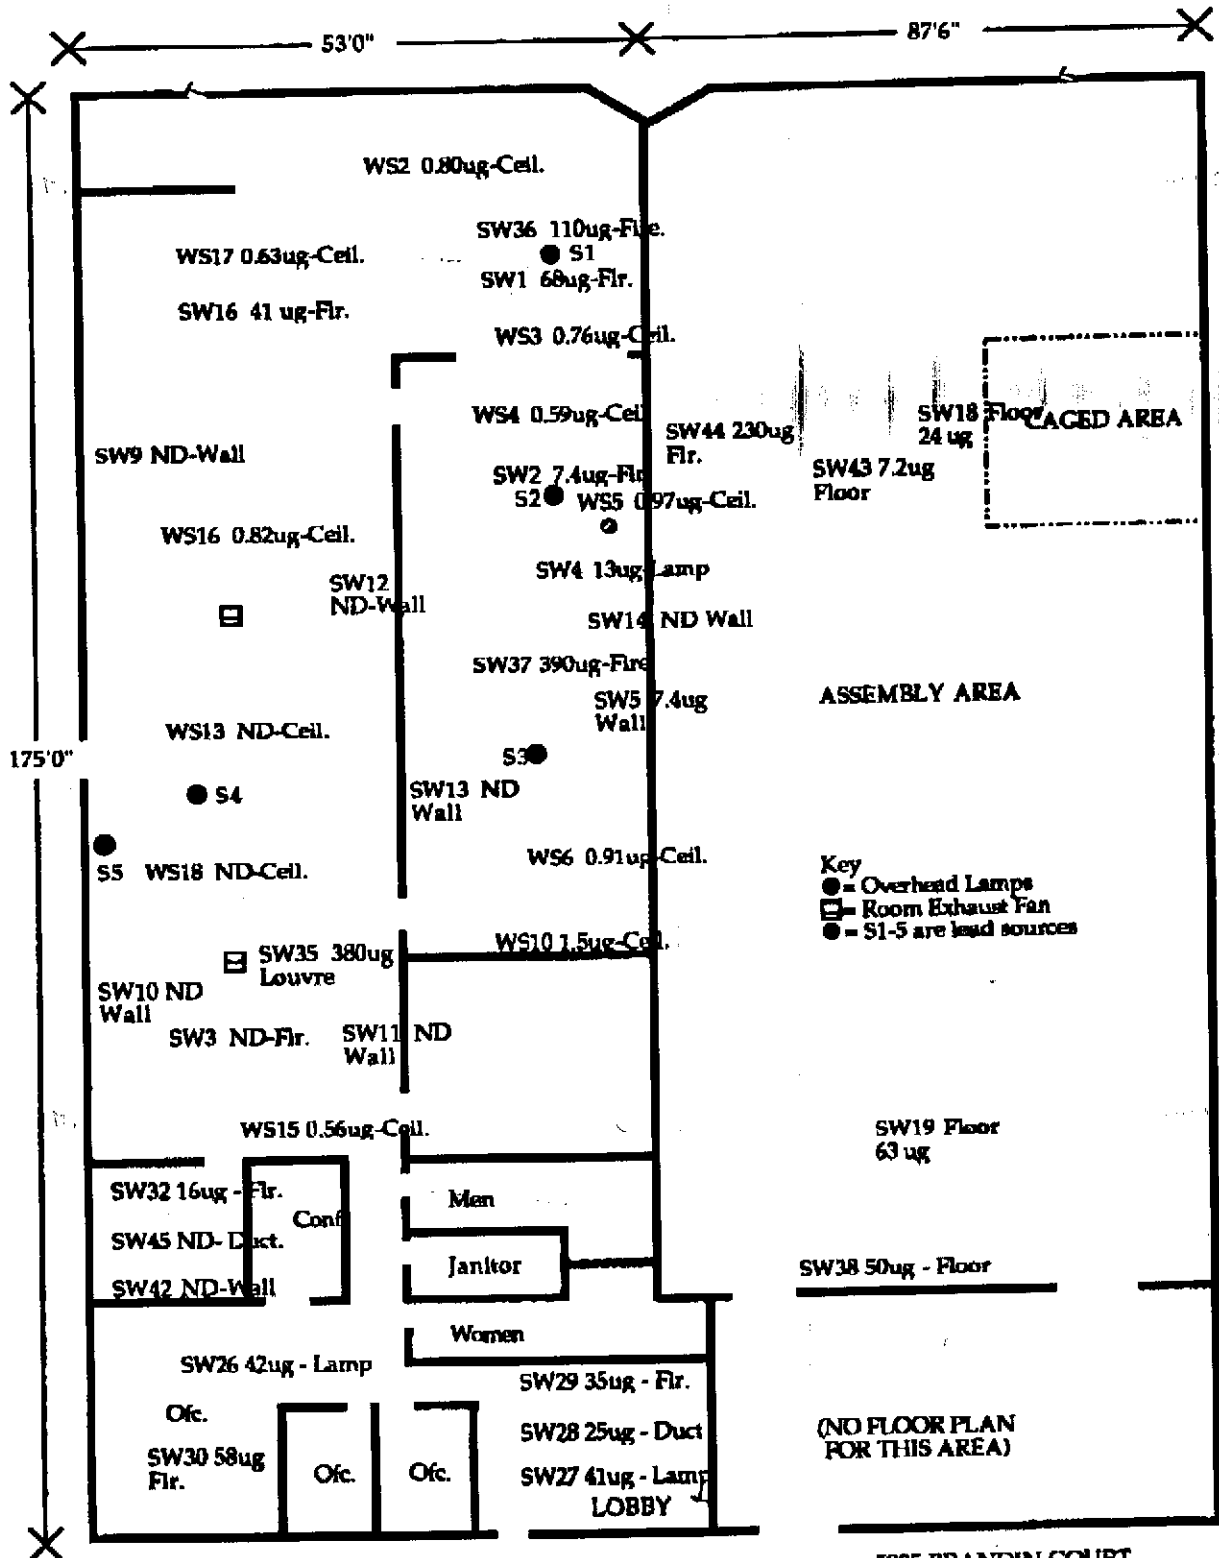

John Schultz, REA 00025
