Meeting w/ Ravi + Consultants (AKS)
M. Kara et al.
Questions:

- 1) Are they removing soil according to the project's needs or according to ~~the~~ pre-determined cleanup levels? (Along tracks)
- Any attempt to determine limits of contamination?
Depends on what they find in confirmation spots
- 2) Need a sampling plan for post remediation sampling. - RA ~ 15 locations @ 1' ~~surf~~ & 3' depth
- 3) Why weren't TPHg and VOCs (8240) run on any samples?
- add an ~~confirmation~~ sample
- 4) Provide copies of ~~the~~ maps for the ^{Geotechnical} Barneys ~~area~~ done previous. @ BART. - will provide
- 5) Any need to take gw samples? - not if they justify no need w/ boring logs (Pit 9) (999-06-0385) (Pit 12) (phenols)
6) Where are the results for herbicide + SVOCs?
- where are the complete data sets? COCs, GCs, etc.
will provide
- 7) Are Ind PRGs for soil OK? , what about gw cleanup stds?
