RE: **Underground Storage Tank Case Closure**
1549 32nd Street
Oakland, CA 94608

Mr. Torkington:

This letter confirms the completion of the site investigation and remedial actions for one 700-gallon underground storage tank (UST) used to store gasoline, at the location above, by Golden Gate Tank Removal Inc. (GGTR). On February 1, 2002 under approval of The City of Oakland Fire Department/Hazardous Materials Management Program (OFD/HMMP) the UST was excavated and removed by GGTR.

OFD/HMMP staff has received a copy of the analytical results. Based on the available information and with the provision that the information provided to OFD/HMMP was accurate and representative of site conditions, no further action related to the UST removed at the above location is required at this time by this office.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at this site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site, which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

If you have any questions, please contact me at (510) 238-7253.

Sincerely,

Hernán E. Gómez
Hazardous Materials Inspector
