Company: Transportation Terminal Services

Start: Thu 12/20/2012 10:14 AM
End: Thu 12/20/2012 10:44 AM
Duration: 30 minutes

Returned a VM call from Bob Lawlor re RO2558 - Di Salvo Trucking, San Lorenzo. He would like case closure for a potential property transaction. I mentioned there were issues to resolved but may be closable under the LTCP. ACEH has not received a RFC. I ask for one to be prepared and to include the checklist posted on our website. Mr. Lawlor indicated he would have his consultant call me.

Consultant Ben Halsted called. We reviewed the consistent anomalous GW data and well construction. He proposed destroying the problematic well and replacing it with a well in a more suitable location. I concurred with the well replacement. We also discussed the elevated metals in GW- one sample only. It was attributed to the sampler used. I said the next round should include a repeat of the metals analysis to put the issue to rest. We missed the opportunity for the 4th Quarter semi-annual event. Next scheduled event is for 2nd Qtr 2013, so report out by end of July 2013.
