Duration: 0 hours

Received call from Ben Halsted with Environmental Restoration Services, consultant for the subject case. Mr. Halsted was inquiring about the Geotracker file upload I requested earlier today. Apparently the GEO_XY for the monitoring well installed last year was not surveyed. I asked how the direction of GW flow could be determined without the well being surveyed. He said the GEO_Z was performed. I requested the well be surveyed prior to its destruction, a figure be prepared with the new data and presented to me should the groundwater flow direction change. I informed Mr. Halsted I needed this data to meet my closure requirements (response to comments).
