Subject: Fw: No current global id for ARCO #0276 (10600 MACARTHUR BLVD., OAKLAND)

Roseanna:

Will you give me an update on the global id for this site. Its status on Geotracker is still CLOSED I have not heard anything since the e-mail back in March. Robert Schultz is no longer with Alameda County Environmental Health. Don Hwang is the new regulator for this site.

Thanks,
Scott

Roseanna:
Will you please set up a new global id in Geotracker for site ref'd above (RO-2565)? It is already in our database, but the consultant has been uploading e-reports to the old global id for a closed case at this site.
When complete, please let me know.
Thank you!
Bob

Correct the site was closed as a LUST case but there was continued quarterly monitoring
for PCE.

AM

If I understand correctly, there is a new case at a site where a former case was previously closed - correct? If that's the case, we need a new global id, and your uploads will need to be moved to the new global. Please confirm, then I'll get a new case setup in geotracker.

Thanks,
Bob

Bob:

I wanted to bring to your attention that ARCO #0276 is using an outdated global I.D. in geotracker (T0600100082). Under this global I.D. the site is listed as "closed" since 4th quarter 1999, but we have been uploading to it anyway.

A URR Report was issued on 1/21/03 due to findings during a Line Upgrade.

Let me know if we should continue to upload to this global I.D. or if you want to set up a new one.

Scott

Schultz, Robert, Env. Health

To: scott_robinson@urscorp.com
Cc: sunn@bp.com
Subject: sampling frequency change

Scott:

Your request to implement the following sampling frequency changes at 10600 Macarthur Blvd. is approved:

1. reduce MW-1, MW-3, MW-4 WGR-3 and RW-1 to annual
2. reduce MW-6 and MW-7 to semi-annual

Wells MW-2, MW-5, MW-8 and RW-1 will continue to be sampled quarterly.

Sincerely,
Bob

**Re: Notification of All Current Record Owners of Fee Title
ARCO facility #276
10600 Mac Arthur Boulevard, Oakland, CA**

Dear Mr. Chan:

I have received your letter, dated June 25, 2003, concerning ARCO facility #276, 10600 Mac Arthur Boulevard, Oakland, California (Record ID: RO0002565). Your letter requested that I provide you with a mailing list of all current record fee owners for this site. I researched the property ownership for this site and found that BP West Coast Products LLC owns facility #276. Therefore, no additional notifications are necessary for this site.

Please call me at (925) 299-8891 if you have any questions concerning this letter.

Sincerely,

Paul Supple

Re: Purge or non-purge sampling procedures

Dear Mr. Chan:

On behalf of ARCO, EMCON has prepared this letter to inform you that we will be sampling wells at ARCO Stations 276 and 2185 in Oakland and 2035 in Albany, California, per the requirements set forth in the San Francisco Bay Regional Water Quality Control Board's letter dated January 31, 1997, regarding utilization of non-purge approach for sampling of monitoring wells impacted by petroleum hydrocarbons, BTEX and MTBE. EMCON will gauge depth to water in each well before sampling to ensure the RWQCB's procedures are met.

If you have questions on the sampling procedures, please call.

Sincerely,

EMCON

Re: Transfer of ARCO Projects.

Dear Ms. Hugo:

The purpose of this letter is to inform you of changes that ARCO Products Company (ARCO) has recently made in regards to environmental consulting firms working on environmental projects at existing and former ARCO retail facilities. In an effort to promote consistency, be more proactive, streamline communications and reduce costs, ARCO has significantly reduced the number of environmental consultants performing assessment and remedial activities on these environmental projects. The consolidation, which took effect on 9/1/94, involves a reduction of approximately 75% to 80% of the consulting firms that ARCO previously used. ARCO firmly believes that this consolidation effort will dramatically streamline ARCO's communication process, both with your office and staff as well as with ARCO's remaining consultants. The consulting firms which ARCO will now use at retail facility environmental projects throughout the west (WA, OR, CA, NV and AZ) include: Brown & Caldwell, Delta Environmental, Emcon Associates, Pacific Environmental Group, and Secor.

Attached to this letter is a list of sites in your jurisdiction that have recently been transferred to one of the five consulting firms listed above. In most cases, these five consulting firms were already working on ARCO projects in your jurisdiction. Also included in the list is the name of the ARCO engineer responsible for the site. please don't hesitate to call the respective ARCO engineer or the consultant's regional contact if you have any questions regarding any of the projects.

The transfer of the projects from the former consultant to one of the five firms listed above should be completed by October 1, 1994. Shortly thereafter I will be contacting you to schedule a meeting to introduce you to the primary contacts at the consulting companies and to review the projects with your staff. Please contact me at (415) 571-2468 if you have any questions concerning this letter.

Sincerely,

Kyle Christie

Subject: Proposed Agenda for Meeting at your office on September 30, 1992.

Dear Ms. Hugo:

We have prepared this proposed agenda for the meeting we have scheduled at your office on September 30, 1992. This meeting will be for discussion of sites under direction of Mr. Richard Hiatt and Mr. John Jang of the Regional Water Quality Control Board (RWQCB). We understand these RWQCB personnel may not be able to attend the entire meetings but may be able to stop by for site specific discussions. A separate meeting to discuss sites overseen by Mr. Eddie So of the RWQCB will have to be scheduled at another date as he has other agencies involved with many of his sites.

Items we would like to discuss include the following: ongoing assessment at the sites, offsite access problems and possible offsite contributing pollutants, schedules for remediation, and other issues as they arise in discussing the sites. If you have any questions or comments concerning this proposed agenda, please call us at (408) 264-7723.

Sincerely,
RESNA Industries, Inc.

Subject: Formal Notification of Intent to Proceed with Proposed Work Described in the Addendum One to Work Plan for Subsurface Investigations and Remediation at ARCO Station 276, 10600 MacArthur Boulevard, Oakland, California.

Dear Mr. Smith:

This letter is submitted by RESNA on behalf of ARCO Products Company to inform you of our intent to proceed with the proposed work described in the Addendum One to Work Plan for Subsurface Investigations and Remediation at the subject site (RESNA, June 27, 1991). We have been in contact with you on several occasions, including a site meeting concerning proposed work at the subject site. Several letters have also been written between ARCO and your agency and between ARCO's consultants and your agency concerning proposed work at the site, however, to date, you have not specifically given approval to proceed with the proposed installation of onsite vapor extraction wells for connection to the existing vapor extraction system at the site or listed any specific changes you would like to see made in our proposed work. The last written correspondence from you was a letter dated October 7, 1991 in which you requested clarification on several items concerning the proposed work. A formal letter of response addressing your concerns was sent to you on November 5, 1991.

To date, we have had no written or verbal response from your agency to our letter of November 5, 1991. Therefore, proceeding under the requirements of Title 23, Article 11, Chapter 16, Sections 2722 (b)(5) and 2726 (c); ARCO intends to implement the Work Plan on February 1, 1992. This letter is a formal notification of ARCO's intent under 2726 (c)(1).

Formal Letter of Intent to Implement Work Plan
ARCO Station 276, Oakland, California

January 29, 1992

If you have any questions or comments, please call us at (408) 264-7723 or Mr. Chuck Carmel at (415) 571-2469.

Sincerely,
RESNA

(415)

August 1, 1991

Mr. Chuck Carmel
Arco Products Co.
P. O. Box 5811
San Mateo, CA 94402

**Re: Arco Station # 276, 10600 MacArthur Blvd., Oakland, CA
94605**

Dear Mr. Carmel,

Alameda County Environmental Health Department, Hazardous Materials Division has received and reviewed the Work plan for Subsurface Investigations and Remediation and Addendum One to Work Plan both dated June 27, 1991.

The work plans propose:

- 1) To drill additional soil borings to evaluate the lateral and vertical extent of contamination at the site.
- 2) The preparation of a Feasibility Study addressing soil remediation and the installation of eight on site vapor extraction wells.
- 3) The submittal of a work plan specifying construction plans and specifications for the above.
- 4) On site groundwater monitoring wells will be installed, developed and sampled as needed in order to delineate the lateral and vertical extent of ground water contamination.
- 5) Hydrologic tests will be conducted to evaluate the potential migration of contamination hydrocarbons.
- 6) The preparation of a Groundwater Remediation Feasibility Study in conjunction with a vapor extraction work plan as necessary.

At this point in time this office requests that you provide us with a report that describes the remediation measures that have been taken to date ~~that~~ have prevented further migration of all identified ^{which} contamination. This office requires a more complete proposed work plan which incorporates the following items:

- 1) All proposed activities are to be 'tasked out' with a committed time line for the initiation and completion of each task.
- 2) You are required to continue/ initiate interim measures to remove free floating product detected in any ground water wells.

Mr. Carmel
August 1, 1991
page 2 of 2

- 3) You are required to specify the locations of the proposed soil borings and the placement of on site wells and also to specify the contaminants sought.
- 4) Provide technical information regarding the design of the proposed on site treatment system and how the system will adapt to the existing off site vapor extraction system that has been installed by Pacific Environmental Group. You are also requested to provide any vapor influence data available on the proposed vapor system.
- 5) An earlier Kaldveer and Associates report (dated October 3, 1988) identified the presence of pesticides and polychlorinated bi-phenyls (PCBs) in soil and ground water. You are required to analyze for these constituents in soil and ground water and to determine the extent of contamination from these constituents.
- 6) You are required to provide specific information to this office outlining a design system for a ground water treatment system which will address the contamination of petroleum hydrocarbon and chlorinated solvents and any other contaminants identified at the above site.

You are required to provide this department with report within 45 days of the receipt of this letter addressing the information outlined above.

All proposals, reports and analytical results pertaining to this investigation and remediation must be sent to our office and also to:

Lester Feldman
Regional Water Quality Control Board, San Francisco Bay Region
2101 Webster Street, 5th Floor
Oakland, California 94612
(415) 464-125

Should you have any questions pertaining to any of the above requests please contact me at 415/ 271-4320.

Sincerely,

Paul M. Smith
Hazardous Materials Specialist
