Hello David,

As we discussed, the approach you have outlined below is acceptable.

Regards,  
Jerry Wickham  
Alameda County Environmental Health

Hi Jerry-

Thank you for taking the time to talk to today about the Searway Property located at 649 Pacific Avenue in Alameda.

As we discussed, Trinity is not going to do any additional testing to determine a site-specific attenuation factor. We are going to hold off on doing any additional testing until such a time in the future that the work scope and procedures for such testing are clear and straightforward the results are more predictable.

We will not be submitting any further technical reports by December 12, 2014 as requested in your letter.

We will continue to operate the active sub-slab venting system per our permit to operate with BAAQMD and to provide annual performance reports for the system. Our last sub-slab venting system performance report was submitted in June 2014 and we will be submitting the next report around June 2015.

If you have any questions please feel free to give me a call.

Regards,

David
