Jerry,

Left you a voice mail too, but wanted to follow it up with an email. We have finally received a draft access agreement from Safety Kleen to sample their wells, and are working through the details and requirements prior to getting back to them. It appears we will be able to sample the wells relatively soon, with a report prepared soon thereafter, most likely late December, early January. Feel free to call me with any questions. We appreciate your patience and understanding on this matter.

Regards,
Matt

Subject: Former Francis Plating Site

Jerry,

This e-mail is a follow-up to my voicemail from earlier today regarding the above referenced site. We are requesting a month extension on the report due October 8 due to numerous factors, primarily the following:

- Took us awhile to get authorization to perform the work
- Took us awhile to identify and contact appropriate representatives from Safety Kleen to access their wells – Have now contacted TriHydro, their consultant, and access is being worked out
- We want to perform the sampling simultaneously so we can also use the data for gradient calculations over larger distance.

Can you call me or Albert Simmons at (925) 951-6402, or respond via e-mail to this request.

We apologize for the delay. Hopefully it won't be too much trouble.

Regards,
Matt
