Subject: Fuel Leak Case No. RO0002604, PG&E Livermore Training Center, 7205 National Drive, Livermore, CA – Work Plan Approval

Dear Mr. Squyres:

Alameda County Environmental Health (ACEH) has reviewed the case file for the above-referenced site and the including the document entitled "Groundwater Investigation Work Plan for PG&E's Livermore Training Center," dated April 18, 2006 and "Updated Site Plan," provided by electronic mail on April 21, 2006. The Work Plan proposes the collection of grab groundwater samples from two soil borings to be located downgradient of the former USTs. ACEH generally concurs with the proposed scope of work provided that the technical comments below are addressed during the field investigation.

We request that you address the following technical comments, perform the proposed work, and send us the reports described below.

**TECHNICAL COMMENTS**

1. **Soil Boring Locations and Proposed Depth.** The proposed locations, depths, and method for collection of grab groundwater samples from the planned soil borings are acceptable.
1. **Soil Samples.** If staining, odor, or elevated PID readings are observed during screening of soil samples in the field, soil samples are to be submitted for laboratory analyses for all depth intervals where the staining, odor, or elevated PID readings are observed. If staining, odor, or elevated PID readings are observed over an interval of several feet, a sufficient number of soil samples from this interval should be submitted for laboratory analyses to characterize the fuel hydrocarbon concentrations within this interval. In addition, one soil sample is to be collected from the capillary fringe if staining, odor, or elevated PID readings are observed at any depth interval within the soil boring. Please present the results in the Groundwater Investigation Report requested below.

**TECHNICAL REPORT REQUEST**

Please submit technical reports to Alameda County Environmental Health (Attention: Jerry Wickham), according to the following schedule:

- **August 25, 2006** – Groundwater Investigation Report

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

#### ELECTRONIC SUBMITTAL OF REPORTS

Effective **January 31, 2006**, the Alameda County Environmental Cleanup Oversight Programs (LOP and SLIC) require submission of all reports in electronic form to the county's ftp site. Paper copies of reports will no longer be accepted. The electronic copy replaces the paper copy and will be used for all public information requests, regulatory review, and compliance/enforcement activities. Instructions for submission of electronic documents to the Alameda County Environmental Cleanup Oversight Program ftp site are provided on the attached "Electronic Report Upload (ftp) Instructions." Please do not submit reports as attachments to electronic mail.

Submission of reports to the Alameda County ftp site is an addition to existing requirements for electronic submittal of information to the State Water Resources Control Board (SWRCB) Geotracker website. Submission of reports to the Geotracker website does not fulfill the requirement to submit documents to the Alameda County ftp site. In September 2004, the SWRCB adopted regulations that require electronic submittal of information for groundwater cleanup programs. For several years, responsible parties for cleanup of leaks from underground storage tanks (USTs) have been required to submit groundwater analytical data, surveyed locations of monitor wells, and other data to the Geotracker database over the Internet. Beginning July 1, 2005, electronic submittal of a complete copy of all necessary reports was required in Geotracker (in PDF format). Please visit the SWRCB website for more information on these requirements ([http://www.swrcb.ca.gov/ust/cleanup/electronic\\_reporting](http://www.swrcb.ca.gov/ust/cleanup/electronic_reporting)).

In order to facilitate electronic correspondence, we request that you provide up to date electronic mail addresses for all responsible and interested parties. Please provide current electronic mail addresses and notify us of future changes to electronic mail addresses by sending an electronic mail message to me at [jerry.wickham@acgov.org](mailto:jerry.wickham@acgov.org).

#### PERJURY STATEMENT

All work plans, technical reports, or technical documents submitted to ACEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document or report is true and correct to the best of my knowledge." This letter must be signed by an officer or legally authorized representative of your company. Please include a cover letter satisfying these requirements with all future reports and technical documents submitted for this fuel leak case.

#### PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS

The California Business and Professions Code (Sections 6735, 6835, and 7835.1) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately registered or certified professional. For your submittal to be considered a valid technical report, you are to present site specific data, data interpretations, and recommendations prepared by an appropriately licensed professional and include the professional registration stamp, signature,

and statement of professional certification. Please ensure all that all technical reports submitted for this fuel leak case meet this requirement.

### UNDERGROUND STORAGE TANK CLEANUP FUND

Please note that delays in investigation, later reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse you for the cost of cleanup.

### AGENCY OVERSIGHT

If it appears as though significant delays are occurring or reports are not submitted as requested, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to \$10,000 per day for each day of violation.

If you have any questions, please call me at (510) 567-6791.

Sincerely,

Jerry Wickham  
Hazardous Materials Specialist

Subject: Fuel Leak Case No. RO0002604, PG&E Livermore Training Center, 7205 National Drive, Livermore, CA

Dear Mr. Squyres:

Alameda County Environmental Health (ACEH) has reviewed the case file for the above-referenced site including the reports entitled "Subsurface Investigation Report," dated July 18, 2005 and "Groundwater Well Information, PG&E Livermore Training Center," dated September 20, 2005. The "Groundwater Well Information," summarizes the status of six monitoring wells located on the perimeter of PG&E's Livermore Training Center. The report indicates that the purpose of the six perimeter wells is unknown and that no records of groundwater sampling and analysis could be located for the wells.

Based on ACEH review of the case file, we request that you **submit a Work Plan by April 21, 2006** to address the technical comments below. Please address the following technical comments, perform the proposed work, and send us the reports requested below.

**TECHNICAL COMMENTS**

1. **Water Quality Downgradient from Former Gasoline UST.** A water sample collected from the unleaded gasoline tank pit contained 7,500 micrograms per liter ( $\mu\text{g/L}$ ) of methyl tert-butyl ether (MTBE) and 2,200  $\mu\text{g/L}$  of tert-butyl alcohol (TBA). A site investigation conducted in June 2005 by SECOR advanced three soil borings outside the former UST excavation to evaluate whether the elevated concentrations of fuel oxygenates detected in the water sample from the tank pit were representative of groundwater quality. Groundwater samples were obtained from two of the three borings (B-1 and B-3). Boring B-1 was located east (upgradient) of the former tank pit and Boring B-3 was located west of the former diesel UST. Boring B-2 was stopped at a depth of 24 feet due to refusal without encountering groundwater.

The regional hydraulic gradient is to the northwest in the area of the site. Review of the "Sampling Report for Fuel Tank Removals, PG&E Training Center," dated December 12, 2003 indicates that the former gasoline UST was in the northern half of the tank pit and that the water sample that contained elevated concentrations of fuel oxygenates was collected in the northwestern portion of the tank pit. Therefore, no groundwater samples have been collected in the immediate vicinity of or downgradient (northwest) of the former gasoline UST. We request that you present plans to collect a groundwater sample directly downgradient of the former gasoline UST in the Work Plan requested below.

2. **Unknown Perimeter Wells.** Prior to decommissioning the six perimeter monitoring wells, groundwater samples should be collected and analyzed. Please propose laboratory analyses for the groundwater samples based on the types of activities and chemicals used or potentially released at the PG&E Training Center. Present the plans for sampling and analysis in the Work Plan requested below.

#### **TECHNICAL REPORT REQUEST**

Please submit technical reports to Alameda County Environmental Health (Attention: Jerry Wickham), according to the following schedule:

- **April 21, 2006 – Work Plan**

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

#### **ELECTRONIC SUBMITTAL OF REPORTS**

Effective **January 31, 2006**, the Alameda County Environmental Cleanup Oversight Programs (LOP and SLIC) require submission of all reports in electronic form to the county's ftp site. Paper copies of reports will no longer be accepted. The electronic copy replaces the paper copy and will be used for all public information requests, regulatory review, and compliance/enforcement activities. Instructions for submission of electronic documents to the Alameda County Environmental Cleanup Oversight Program ftp site are provided on the attached "Electronic Report Upload (ftp) Instructions." Please do not submit reports as attachments to electronic mail.

Submission of reports to the Alameda County ftp site is an addition to existing requirements for electronic submittal of information to the State Water Resources Control Board (SWRCB) Geotracker website. Submission of reports to the Geotracker website does not fulfill the requirement to submit documents to the Alameda County ftp site. In September 2004, the SWRCB adopted regulations that require electronic submittal of information for groundwater cleanup programs. For several years, responsible parties for cleanup of leaks from underground storage tanks (USTs) have been required to submit groundwater analytical data, surveyed locations of monitor wells, and other data to the Geotracker database over the Internet. Beginning July 1, 2005, electronic submittal of a complete copy of all necessary reports was required in Geotracker (in PDF format). Please visit the SWRCB website for more information on these requirements ([http://www.swrcb.ca.gov/ust/cleanup/electronic\\_reporting](http://www.swrcb.ca.gov/ust/cleanup/electronic_reporting)).

In order to facilitate electronic correspondence, we request that you provide up to date electronic mail addresses for all responsible and interested parties. Please provide current electronic mail addresses and notify us of future changes to electronic mail addresses by sending an electronic mail message to me at [jerry.wickham@acgov.org](mailto:jerry.wickham@acgov.org).

**PERJURY STATEMENT**

All work plans, technical reports, or technical documents submitted to ACEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document or report is true and correct to the best of my knowledge." This letter must be signed by an officer or legally authorized representative of your company. Please include a cover letter satisfying these requirements with all future reports and technical documents submitted for this fuel leak case.

**PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS**

The California Business and Professions Code (Sections 6735, 6835, and 7835.1) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately registered or certified professional. For your submittal to be considered a valid technical report, you are to present site specific data, data interpretations, and recommendations prepared by an appropriately licensed professional and include the professional registration stamp, signature, and statement of professional certification. Please ensure all that all technical reports submitted for this fuel leak case meet this requirement.

**UNDERGROUND STORAGE TANK CLEANUP FUND**

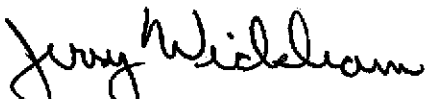

Please note that delays in investigation, later reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse you for the cost of cleanup.

**AGENCY OVERSIGHT**

If it appears as though significant delays are occurring or reports are not submitted as requested, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to \$10,000 per day for each day of violation.

If you have any questions, please call me at (510) 567-6791.

Subject: Fuel Leak Case No. RO0002604, PG&E Livermore Training Center, 7205 National Drive, Livermore, CA

Dear Mr. Pforr:

Alameda County Environmental Health (ACEH) has received the report entitled "Subsurface Investigation Report, PG&E Livermore Training Center," dated July 18, 2005 prepared on behalf of PG&E by Secor. The report summarizes the results from soil and water samples collected on June 3, 2005 from three boring locations in the vicinity of one former gasoline and one former diesel underground storage tank (UST) at the above referenced facility. In correspondence dated June 28, 2005, ACEH requested a Work Plan for a site investigation in the area of the former USTs. The June 2005 investigation, which was conducted without a formal Work Plan, meets the requirements for an initial investigation of the site. Therefore, a Work Plan for additional site characterization is not required at this time.

Based on information provided by the Zone 7 Water Agency, monitoring wells are located at the Livermore Training Center in the area of the former USTs. Please submit the following information on these monitoring wells:

- Status of the wells, whether active or destroyed. Please provide dates on when the wells were installed and destroyed.
- Purpose of the monitoring wells.
- Map showing the location of the wells in relation to the former USTs.
- Information on the depth and construction of the monitoring wells.
- Analytical data for samples collected from the wells.
- Summary of water level information.
- Boring logs.

We request that the above information be submitted by September 19, 2005.

### **PERJURY STATEMENT**

All work plans, technical reports, or technical documents submitted to ACEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document or report is true and correct to the best of my knowledge." This letter must be signed by an officer or legally authorized representative of your company. Please include a cover letter satisfying these requirements with all future reports and technical documents submitted for this fuel leak case.

### **PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS**

The California Business and Professions Code (Sections 6735, 6835, and 7835.1) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately registered or certified professional. For your submittal to be considered a valid technical report, you are to present site specific data, data interpretations, and recommendations prepared by an appropriately licensed professional and include the professional registration stamp, signature, and statement of professional certification. Please ensure all that all technical reports submitted for this fuel leak case meet this requirement.

### **UNDERGROUND STORAGE TANK CLEANUP FUND**

Please note that delays in investigation, later reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse you for the cost of cleanup.

### **AGENCY OVERSIGHT**

If it appears as though significant delays are occurring or reports are not submitted as requested, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to \$10,000 per day for each day of violation.

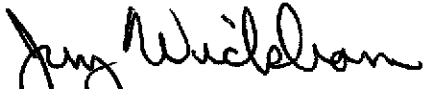

### **GEOTRACKER EDF SUBMITTALS**

Pursuant to CCR Sections 2729 and 2729.1, beginning September 1, 2001, all analytical data, including monitoring well samples, submitted in a report to a regulatory agency as part of the LUFT program, must be transmitted electronically to the SWRCB GeoTracker system via the internet. Additionally, beginning January 1, 2002, all permanent monitoring points utilized to collect groundwater samples (i.e. monitoring wells) and submitted in a report to a regulatory agency, must be surveyed (top of casing) to mean sea level and latitude and longitude to sub-meter accuracy, using NAD 83, and transmitted electronically to the SWRCB GeoTracker system via the internet. Beginning July 1, 2005, electronic submittal of a complete copy of all necessary reports is also required in Geotracker (in PDF format). Please upload all analytical data (collected on or after September 1, 2001), to the SWRCB's GeoTracker database website in accordance with the above-cited regulation.

Jonathon G. Pforr

Subject: Fuel Leak Case No. RO0002604, PG&E Livermore Training Center, 7205 National Drive, Livermore, CA – Request for Work Plan

Dear Mr. Pforr:

Alameda County Environmental Health (ACEH) staff has reviewed the case file and the report "Sampling Report for Fuel Tank Removals," dated December 12, 2003 prepared on behalf of PG&E by geo-logic. The report summarizes the results from soil and water samples collected on December 3 and 4, 2003 during the removal of one gasoline and one diesel underground storage tank (UST) at the above referenced facility. Four soil samples were collected from native soil in the sidewalls of the UST excavations at a depth of approximately 10 feet below grade. Total petroleum hydrocarbons (TPH) as gasoline, TPH as diesel, benzene, toluene, ethylbenzene, and xylenes (BTEX), and methyl tert-butyl ether (MTBE) were not detected in the soil samples. Two water samples were collected from each of the two UST excavations. TPH as gasoline and BTEX were not detected in the two water samples. TPH as diesel was detected at a concentration of 300 micrograms per liter ( $\mu\text{L}$ ) in one water sample from the diesel tank excavation. MTBE was detected at a concentration of 7,500 micrograms per liter ( $\mu\text{L}$ ) and t-butyl alcohol (TBA) was detected at a concentration of 2,200  $\mu\text{L}$  in the water sample from the gasoline UST excavation.

Livermore-Pleasanton Fire Department referred this case to ACEH on January 8, 2004. Based on the concentrations of MTBE and TBA detected in water at the site, an investigation is required to assess the extent of contamination beneath your site. We recommend that your investigation incorporate expedited site assessment techniques. Therefore, we recommend that you utilize direct push technology to collect soil samples and depth-discrete groundwater samples prior to the installation of groundwater monitoring wells. Sampling locations should be located to assess the extent of soil and groundwater contamination. Other options for additional investigation may be appropriate to define contamination at your site.

**Please submit a work plan detailing your proposal to define the extent of soil and groundwater contamination by September 28, 2005.** This report is being requested pursuant to the Regional Water Quality Control Board's (Regional Board) authority under Section 13267 of the California Water Code.

### **TECHNICAL REPORT REQUEST**

Please submit technical reports to Alameda County Environmental Health (Attention: Mr. Jerry Wickham), according to the following schedule:

- **September 30, 2005 – Work Plan for Soil and Groundwater Investigation**

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

### **LANDOWNER NOTIFICATION REQUIREMENTS**

Pursuant to California Health & Safety Code Section 25297.15, the active or primary responsible party for a fuel leak case must inform all current property owners of the site of cleanup actions or requests for closure. Furthermore, ACEH may not consider any cleanup proposals or requests for case closure without assurance that this notification requirement has been met. Additionally, the active or primary responsible party is required to forward to ACEH a complete mailing list of all record fee title holders to the site.

At this time, we require that you submit a complete mailing list of all record fee title owners of the site by **July 28, 2005**, which states, at a minimum, the following:

*A. In accordance with section 25297.15(a) of Chapter 6.7 of the Health & Safety Code, I, (name of primary responsible party), certify that the following is a complete list of current record fee title owners and their mailing addresses for the above site:*

*- OR -*

*B. In accordance with section 25297.15(a) of Chapter 6.7 of the Health & Safety Code, I, (name of primary responsible party), certify that I am the sole landowner for the above site.*

*(Note: Complete item A if there are multiple site landowners. If you are the sole site landowner, skip item A and complete item B.)*

In the future, for you to meet these requirements when submitting cleanup proposals or requests for case closure, ACEH requires that you:

1. Notify all current record owners of fee title to the site of any cleanup proposals or requests for case closure;
2. Submit a letter to ACEH which certifies that the notification requirement in 25297.15(a) of the Health and Safety Code has been met;
3. Forward to ACEH a copy of your complete mailing list of all record fee title holders to the site; and
4. Update your mailing list of all record fee title holders, and repeat the process outlined above prior to submittal of any additional *Corrective Action Plan* or your *Request for Case Closure*.

Your written certification to ACEH (Item 2 above) must state, at a minimum, the following:

*A. In accordance with Section 25297.15(a) of the Health & Safety Code, I, (name of primary responsible party), certify that I have notified all responsible landowners of the enclosed proposed action. (Check space for applicable proposed action(s)):*

*cleanup proposal (Corrective Action Plan)*

*request for case closure*

*local agency intention to make a determination that no further action is required*

*local agency intention to issue a closure letter*

- OR -

*B. In accordance with section 25297.15(a) of Chapter 6.7 of the Health & Safety Code, I, (name of primary responsible party), certify that I am the sole landowner for the above site.*

**(Note: Complete item A if there are multiple site landowners. If you are the sole site landowner, skip item A and complete item B.)**

#### **PERJURY STATEMENT**

All work plans, technical reports, or technical documents submitted to ACEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I declare, under penalty of perjury, that the information and/or recommendations contained in the attached document or report is true and correct to the best of my knowledge." This letter must be signed by an officer or legally authorized representative of your company. Please include a cover letter satisfying these requirements with all future reports and technical documents submitted for this fuel leak case.

#### **PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS**

The California Business and Professions Code (Sections 6735, 6835, and 7835.1) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately registered or certified professional. For your submittal to be considered a valid technical report, you are to present site specific data, data interpretations, and recommendations prepared by an appropriately licensed professional and include the professional registration stamp, signature, and statement of professional certification. Please ensure all that all technical reports submitted for this fuel leak case meet this requirement.

#### **UNDERGROUND STORAGE TANK CLEANUP FUND**

Please note that delays in investigation, later reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse you for the cost of cleanup.

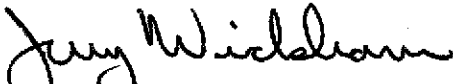

Jonathan G. Pforr  
June 28, 2005
