Re: Removal of Two Underground Fuel Storage Tanks  
from PG&E's Livermore Training Center, 7205 National Drive, Livermore.

Subject: Disposition of Disposed Waste Materials

- Unleaded and Diesel Fuel Only minimal residual quantities of fuel were left in the tanks at the time of removal. The residual was removed during the tank rinsing process on 12/02/2003.
- Tank Rinsate Approximately 1,500 gallons of tank rinsate was transported on 12/02/2003 by Philip Transportation to Romco Environmental Services in East Palo Alto where it was recycled. A copy of signed hazardous waste manifest No. 31629529 is enclosed.
- Tanks - Two washed inerted 3,000 Gallon double-walled steel storage tanks were transported on 12/04/2003 by Philip Transportation to Ecology Control Industries in Richmond for further decontamination and scrapping. A copy of signed hazardous waste manifest No. 22846694 is enclosed.
- Fiberglass Petroleum Piping This material was cleaned on 12/02/2003 by rinsing (into the tank) prior to removal. The dried piping was then crushed and placed into two 55 gallon hazardous waste storage drums on 12/05.2003 which are presently being stored in the facility's hazardous waste storage shed for pick-up on the next hazardous waste milk run pick up, which is scheduled for March 2004. A hazardous waste manifest will be written just prior to pick-up.
- Steel Petroleum Piping This material was rinsed, drained, dried, and placed into a scrap metal bin on 12/05/2003 along with manhole covers and miscellaneous steel items for pick-up and recycling by SIMS Metals, 30104 Industrial Parkway S.W., Hayward, CA, 94544.
- Dispensers Two electric powered suction pump dispensers were transferred to Philip Transportation and Remediation on 12/04/2003 for re-use at their facility in San Martin. Pick-up tag is enclosed.

  
Jonathon G. Pforr  
PG&E Project Manager

LAND DISPOSAL RESTRICTION NOTIFICATION FORM

NOTE: 1 DIESEL DISPENSER  
AND 1 UNLEADED DISPENSER  
ARE INCLUDED.

The waste represented on this manifest is not generated by a chemical manufacturing plant, coke-by-product recovery plant of petroleum refinery. As such, it is not regulated under 40 CFR Part 61, Subpart FF (NESEAPS for Benzene Operations).

Pursuant to 40 CFR 268.7 I am notifying Ecology Control Industries that the material described by the above manifest is a nonwastewater, Non-RCRA solid hazardous waste and not currently subject to EPA Land Disposal Restrictions.

Pursuant to CCR 22 66268.7 I am notifying Ecology Control Industries that the material described by the manifest is a metal containing Non-RCRA solid hazardous waste (662683.29(g)), and an organics containing Non-RCRA solid hazardous waste (66268.29(k)). The treatment standards for these wastes have been repealed. This waste is no longer subject to land disposal restrictions.

I am an authorized agent/representative of the generator. I certify that all information submitted in this and associated documents is complete and accurate to the best of my knowledge. The tanks on the transport equipment have been numbered to correspond with the information provided above. In the event that the tanks do not correspond to the form, I will pay any and all costs incurred in rectifying the discrepancy(ies) between the tank(s) and the form. In the event that the tank(s) contain excessive solids or liquids, I agree to pay the cost of preparation, transportation and disposal/recycling of the excess material according to the schedule of charges in effect at the time of receipt of the tank(s). Further, I will not hold Ecology Control Industries responsible for any damage to tanks which occurs after the tanks are removed from the ground.
