P.O. Box 773
Union City, CA 94587

RE: All-Good Pallets, Inc.
3862 Depot Road
Hayward, CA 94545

Dear Mr. Nagra:

On February 20, 1997 I performed a Hazardous Materials Business Plan inspection at your above facility. During this inspection, I observed an oil spill on the soil near the office trailer that will have to be cleaned up. I collected a sample of this stained soil. I have enclosed a copy of the laboratory analytical results from this sample.

Our lab results indicate Total Oil and Grease (TOG) content of 9.6% or 96,000 parts per million. There is a concern that levels of TOG, metals or other contaminants will exceed hazardous waste regulatory criteria specified in Section 66261.20 of Title 22 of the California Code of Regulations. You are therefore required to either perform laboratory analysis as per the above criteria or to perform a soil cleanup.

Submit a work plan to this office within 30 days to address this soil contamination. The work plan should include: a description of soil remediation measures of the affected area; confirmatory soil sample analytical results of the same area; analytical results from the excavated soil and soil disposal receipts from an approved disposal site.

You are required to have soil confirmation samples taken beneath the affected area to indicate that all contamination has been removed. The sampling must be conducted by an authorized third party laboratory that is certified to perform total petroleum hydrocarbon analysis or other criteria required by an approved disposal site.

Mr. Jesse Nagra

RE: All-Good Pallets, Inc.,
3862 Depot Road
Hayward, CA 94545

Dear Mr. Nagra:

On February 20, 1997 I performed a Hazardous Materials Baseline
Plan inspection at your above facility. During this inspection
observed an oil spill on the soil near the office. It must
have to be cleaned up. I collected a sample of this spill.
I have enclosed a copy of the laboratory analytical results
this sample.

Our lab results indicate Total Oil and Grease (TOG) content of 26,000
or 26,000 parts per million. There is a concern that levels of
TOG, metals or other contaminants will exceed hazardous waste
regulatory criteria specified in Section 66261.20 of Title 25 of
the California Code of Regulations. You are therefore required to
either perform laboratory analysis as per the above criteria or to
perform a soil cleanup.

Submit a work plan to this office within 30 days to address this
soil contamination. The work plan should include a description of
soil remediation measures of the affected area; confirmatory soil
sample analytical results of the same area; analytical results from
the excavated soil and soil disposal receipts from an approved
disposal site.

You are required to have soil confirmation samples taken beneath
the affected area to indicate that all contamination has been
removed. The sampling must be conducted by an authorized third
party laboratory that is certified to perform total petroleum
hydrocarbon analysis or other criteria required by an approved
disposal site.

Mr. Charles Mugg
Safety Director
Freymiller Trucking, Inc
1400 South Union Avenue,
Bakersfield, CA - 93307

REF: 3862 Depot Road, Hayward, CA- 94545

Dear Mr. Mugg:

I am in receipt of the summary report from Mr. Rommel Querol of Laid Law. I have reviewed the soil sample results collected from the above referenced property and the verification samples indicate that the contaminated soil has been effectively removed. Based on the information provided to this office, the excavation can be backfilled with clean soil and the concentration of diesel remaining in soil do not pose a threat to public health. Excavated soil needs to be profiled and disposed appropriately. Please be aware that this site will not be considered closed until this office receives a copy of the manifest for soil disposal.

If you have any questions, please call me.

Sincerely,

Madhulla Logan
Hazardous Material Specialist

CC: Rommel Querol, Laid Law

Comments:
 Surface Discharge of 30-75 Gallons of Diesel fuel. Freymiller Trucking, Inc. has been positively identified as the responsible party for this discharge. Freymiller Trucking is hereby required to perform the following:
 1. Remove all liquid diesel fuel product from the surface of this site.
 2. Properly remove all contaminated rock, absorbent and contaminated soil. Soil removal must be performed until there are no visible signs of contamination and there is no odor of diesel fuel remaining in the existing soil. Properly dispose of all contaminated soil as Hazardous Waste w/ a legal manifest.
 3. Prepare a sample protocol for the entire area affected by the diesel discharge. If groundwater has been impacted, establish confirmatory sampling for both soil and water.

Comments:

4. Before sampling, prepare a work plan. This plan should include: A) a site safety plan B) a history of the incident C) Remediation to date D) Sampling for soil and groundwater, if necessary. All soil and water samples must be analyzed for TPH-D & BTEXE.

5. All Areas within the public street of Depot Road must be free of absorbant and excessive diesel fuel.

6. Submit a closure report for this site to our office.

7. Begin initial cleanup immediately
