Subject: RO2899 and RO 2633 - PG&E Piedmont Substation - Excavation Schedule

Hi Mark,

Building demolition including foundation and vault removal was completed last week. We collected 4 soil samples from within the building footprint from soil beneath the vaults and foundation system.

Surface soil scraping is scheduled to begin Thursday morning at 7:00 am 11/6/14, and is expected to take several days to complete. We will begin collecting confirmation samples on 11/6/14 or 11/7/14.

Please let me know if you have any questions or need any additional information. Thank you!

Paul
