Re: No Further Action at 1849 Oak Street, Alameda, CA

Dear Mr. Bailey:

I have completed review of Geocon's August 1997 Phase 1 Environmental Site Assessment report for the above referenced site. That report has been reviewed and it is our opinion that low concentrations of volatile organic compounds (VOCs) identified in groundwater should not pose a risk to human health or the environment.

Based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the groundwater contamination is required.

If you have any further questions concerning this matter, please contact me at (510) 567-6762.

Sincerely,

eva chu
Hazardous Materials Specialist
