Final Remediation Report

**Environmental Consulting and Remediation Services
Casterson Ranch Contamination Removal
5020 Tassjara Rd.
Dublin, CA,**

Introduction

This report summarizes the actions take to remediate the environmental contamination at the Casterson Ranch Properties, Dublin, California. The extent of the contamination is detailed in the Phase 2 - Environmental Site Assessment Report by Berlogar Geotechnical Consultants (BGC). Asbestos from the residence and soil contaminated with lead or diesel fuel was identified in the Phase 2 report and were remediated by excavation, and disposal at permitted facilities.

Asbestos

Asbestos was removed and disposed of by Bluewater Environmental Services. The Certification of completion is attached.

Lead Contaminated Soil

~~Five tons of lead contaminated soil~~ was removed from the area of the Welding Shop as identified in the Phase 2 report. The first ton, which was removed from the surface, tested high enough in lead that it qualified as a U.S. EPA -RCRA waste and was disposed of by stabilization followed by burial. The other four tons of soil were below the U.S. EPA limits, but above the Cal-EPA limits and were disposed of by direct burial. Hazardous waste manifest 90472987 documenting the disposal of this soil is attached.

Diesel fuel contaminated soil

A total of ~~ten tons of diesel fuel contaminated soil~~ was removed from the areas identified as Area B, Area C, and Area D in the BGC post-remediation report. This soil was transported to TPS Technologies, Inc. in Richmond California, for thermal treatment. Ten manifests documenting this disposal are attached.

Mr. J. David Schneider
August 17, 1998
page 2

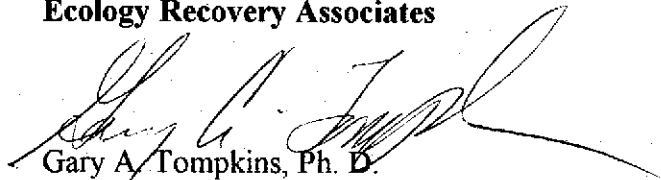

Recommendations

Based upon the proper remediation of the contaminants identified in the Phase 2 report, and the results of the soil and water sampling program detailed in the BGC post-remediation report, no further soil removal is warranted, and we believe that the project should be certified by the appropriate regulatory agency as properly remediated. This conclusion is based on the data presented in the BGC reports. The discussion and recommendation contained herein is a professional opinion derived in accordance with current standards of practice; no other warranty is expressed or implied.

Should you require any additional information, please contact the undersigned at (925) 484-4760.

Respectfully submitted,

Ecology Recovery Associates

Gary A. Tompkins, Ph. D.
Project Manager
REA 5823, Exp 6/30/99

Attachments:

- Certificate of Completion-Asbestos
- Manifest (1) - Lead contaminated soil
- Manifests (10) - Diesel fuel contaminated soil

CERTIFICATE OF COMPLETION

Site: Casterson Ranch
5020 Tassajara Road
Pleasanton, CA 94568

Scope of Work: Remove and dispose of asbestos containing floor linoleum,
and transite pipe materials located at the above site.

Sample: #2 Clearance 0.005 f/cc

Completion Date: 06/11/98

All asbestos waste identified above has been disposed of at Forward Landfill, Manteca, California .

Chris J. Kirschenheuter
President
