Ms. Wallace,

Thanks for your email. From a review of the file (as the new case worker associated with the site) it does appear that the current owners are conducting an investigation into the releases that occurred at the site. You were notified because the new Resolution (2009-0042) requires that all parties associated with a case be informed of the change in monitoring requirements. You should also have received a form to allow us to update your contact information should it have changed. If I could request that the form be filled out and returned, it would be greatly appreciated (it allows us to verify that the information is up to date). If it is simpler for you to scan and email it, please do so; your choice!

Best,

Mark Detterman

HEALTH CARE SERVICES

Att: Mark Detterman

Re: July 24th letter, 1210 Bockman Rd.

We sold the San Lorenzo Bockman properties in 2006. Before we sold the property, we shut down the gas station as far as pumping gas and removed the gas holding tanks, which were in good condition. Unfortunately, we could not keep up with the contently changing and expensive revised requirements needed to continue pumping the gas. I assume the new owners are informed and will comply with your requirements.

Sincerely,

Carol Wallace
