Subject: RE: Shell Station, 8999 San Ramon Road, Dublin

Based on the sample results, further sampling and excavation of shallow soil related to the station upgrade does not appear to be necessary.

Jerry,

Based on the sample results we discussed I think we can tell Garlow that no additional soil sampling and excavation is needed. Comments?

Robert Weston

Subject: Shell Station, 8999 San Ramon Road, Dublin

Mr. Weston,

On May 28, 2008, you were present for removal of gasoline dispenser supply lines at the above referenced station and soil samples were collected at requested intervals. The analytical results were sent to you on June 3, 2008.

We are now proceeding with final excavation of new dispenser supply lines and canopy foundations. We will be preparing to characterize and transport the soil. Will the county require any additional soil sampling or excavation at this site?

Thank you,

Rich Garlow
