Entry Type: Phone call
Company: Shell Oil Products US

Start: Fri 8/27/2004 4:36 PM
End: Fri 8/27/2004 4:36 PM
Duration: 0 hours

called and left v-mail for Karen re. pending investigation requirements at the site, requested that Karen call me back
my thoughts:

- piping run from USTs to dispenser was impacted, pre Rob
- additional investigation may end up being shallow (though gw sample will be required) as a result of clay at ~4 ft.
- expedite investigation and reduce costs (and risk to UST system) by performing investigation: 1. clean out trench to see native soil and collect samples, 2. perform limited overex and sampling
- pea gravel could be reused if sampled
