They will be demolishing the station at 8999 San Ramon Road and replacing the dispensers in a new location. Rich Garlow asked if I would be on site to oversee the excavation and upgrade. I indicated that Robert Weston would oversee the tank upgrade and would likely be on site to direct sampling. Since this is an open fuel leak case, I will work with Mr. Weston. Monitoring wells are to be decommissioned May 22-23. I informed him that permitting and inspection of well decommissioning is under direction of Zone 7.
