Subject: Sunshine Cleaners Work Plan - Addendum
Attachments: Sunshine Cleaners Site Plan.pdf

Mr. Detterman,

Per your request in our conversation on 12 August 2016, AGE has prepared this email addendum for the Sunshine Cleaners site located at 223 East 14th Street, San Leandro, CA. The label for MW-2 has been changed as it was mislabeled in the original Site Assessment Work Plan. The two locations on the west side of the site plan have been slightly moved to the east and on the Sunshine Cleaners property. Lastly, two additional contingent borings have been added (in red) within the site building. The borings will be advanced if access is available and utilities are not present.

As mentioned in our conversation, the responsible party would like to take a stepped approach to the proposed work scope. As discussed they would like to complete the site assessment portion of the work plan and potentially sample the domestic well (if granted access by the property owner) during the first step and then perform the monitoring event during the second step (hopefully starting a semi-annual monitoring program).

Please let me know if you have any questions.

Regards,

Daniel Villanueva
