Attention: Mr. Craig Henrich

Reference: Groundwater Monitoring - 2nd Year, 2nd Quarter  
Mills Springs Park Apartments  
1809 Railroad Avenue, Livermore 94550

Dear Mr. Henrich:

Enclosed are the chain of custody form and certified laboratory results for the second year, second quarter sampling performed by Aqua Resources Inc. (ARI) as part of the groundwater monitoring program at the above site.

Approximately 3 to 4 volumes of water were removed from the well before three samples were collected on May 2, 1991. The samples were analyzed by EPA method 8020 for benzene, toluene, ethylbenzene and xylene. All samples show concentration of benzene of 2 ppb which is above California maximum contamination level (MCL) (1 ppb) but below the Federal MCL (5 ppb). Concentrations of other compounds were below method detection limit.

Please do not hesitate to call if you have any questions.

Sincerely yours,  
AQUA RESOURCES INC.

Wojciech Bajzarowicz, R.E.A.  
Senior Environmental Engineer
