

6000 S Corp / ABI

10-1-91

- meeting w/ Dave Robinson (ABI)

// different coke than Newark case?  
Cl<sup>-</sup> content differing?  
dibenzodioxin / dibenzofurans

// DR feels ~5% at most is baghouse waste

// DHS Sacto (916) 323-4910

Bob Hoffman - TSCD legal counsel

- CALL
- possible delisting based on lead level and minimal solubility
  - lead is not only (potential) issue

Waste Source Evaluation

// ABI could screen materials to 3 separate "piles":

2,  $\frac{1}{2}$ , —  
①, ②

① = # times (retest)  
- ~~this~~ This would separate the rubble, tires, steel, etc. from slag, sand, fines

③ - then test material - if hazardous, separate it more completely to remove fines - retest

- 12-18 mos. to screen material based on RD, manpower limitations,

TOO MUCH TIME?
