SUBJECT: Monthly Monitoring, Environmental Engineering Services, Industrial Asphalt Facility, Pleasanton, California

Dear Mr. Hunt:

Kleinfelder, Inc., is pleased to submit the results of our monthly monitoring and sampling activities at the Industrial Asphalt facility in Pleasanton, California. Field activities were performed on May 8, 1989. At this time, as recommended in our Status Report No. 4 dated April 19, 1989, only water level and free product thickness data for the eight onsite monitoring wells were collected. This information is summarized in Table 1.

Generally, as indicated by the data, the ground water surface beneath the site dropped as compared to the previous monitoring round.

If you have any questions, please contact the undersigned.

Sincerely,

KLEINFELDER, INC
