Thanks for the reply. I have assembled quite a pile of information showing that full disclosure of the Blymyer report was made to all purchasers of the live/work units, including subsequent resales. I will, at your suggestion, retain these documents rather than upload them now in the expectation that I will present them to you at a later date.

I am still unable to determine why I didn't receive notification from the County . Your August 24, 1998 Health Risk Assessment was, I am almost certain, the last I heard from anyone.

Needless to say, the sooner this can be dealt with the beter as far as I am concerned.

Russell Vincent

Russell,

I did get your voice mail from Wednesday, but had not had a chance to speak with someone until late yesterday. As we knew the case will be transferred, to Barbara Jakub (639-1287). At this point, I would not upload the information you were in the process of scanning; however, I think it will still be useful at some point. Fortunately and unfortunately ACEH (and all other local agencies) has been tasked by the state to conduct case reviews of all cases between now and June 30, 2010. That process will take some time, but you will also be guaranteed a review of the case in that time. ACEH is attempting to have this done by January 30, at least the vast majority. Recommendations would likely follow thereafter. So for now, the county is only asking that the site be claimed in Geotracker, and then it's back to a waiting period. As I think I had said previously, the county has been understaffed, and will now be working through the case load now that it's been redistributed and reduced by the addition of myself; it'll still take some time. Hopefully this helps...

Best,

Mark Detterman
