Return voice mail (@ 230-ish) from David Kelly left 1241 May 13, 2013.

Receive call from Mr. Kelly who is the potential tenant for the site, with the intent to open an organic restaurant. He is attempting to understand timing of NFA. Let him know I know a very limited amount about the site as no recent documents have been submitted, although they have been intended for several months. Apparently the nature of the contamination has not been disclosed but only very recently and he and his investors are attempting to understand how to proceed. From descriptions I have received by email or phone it sounds like the owner is attempting to do the correct thing, but I have no information to go on other than these somewhat informal conversations. I understand a vapor venting system is proposed, and they are typically monitored for a number of years to verify that they are functioning. It is a standard approach to former dry cleaner sites across the country, but the details are each site can be difficult to settle. I let him know about the County website and that all docs we have are posted there. He will send me an email so that I can send him information on how to get there; it can be a bit difficult.
