Duration: 15 minutes

Talked with Norm Oldlackey (sp?) about the site at 1240 Powell St. The owner, Fred Silverman, received the July 3, 2008 letter during a Phase I review for refinancing of the property. Norm said they were going to resample the wells and request closure for the site. I requested that they include all groundwater data on one table and provide the rest of the report for the 2004 GWM report. The data, text and maps are missing from the report.
