RE: Chevron Pipeline Company Sunol, CA Site

Dear Mr. Wickham:

Chevron Pipeline Company (CPL) received and reviewed your September 19, 2012 conditional approval letter of our workplan for the Sunol, CA Site developed by URS Corp. (URS) on CPL's behalf. CPL agrees to implement your request to install a third groundwater monitoring well along Calaveras Road in our first round of groundwater well installation. The three initial wells to be installed are as follows:

- 25 feet to the north of existing monitoring well MW-8.
- 50 feet to the north of existing monitoring well MW-8.
- 25 feet to the south of existing monitoring well MW-8.

One conditional well, 50 feet to the south of existing groundwater monitoring well MW-8 will only be installed if the intermediate well 25 feet to the south of MW-8 shows gasoline components, per our workplan. URS has submitted a proposal to conduct this work and CPL is in the process of approving the proposal. We assume the work will be conducted in late November 2012.

If you have any questions on this letter, please let me know.

Sincerely yours,
Chevron Pipeline Company

Stephen Gwin
