Subject: SLIC Case No. RO0002892, Chevron Sunol Pipeline, 2793 Calaveras Rd, Sunol, CA  
**Proposed Installation – SVE System**

Dear Mr. Wickham:

URS, on behalf of Chevron Pipeline Company (CPL), is updating Alameda County Environmental Health (ACEH) regarding the restarting of a Soil Vapor Extraction (SVE) System at the CPL site near Sunol, California.

### **Summary of Proposed Activities**

URS and CPL have conducted the following in order to facilitate installation of the proposed SVE system:

- Tree removal is ongoing and should be completed by the week of June 16, 2008. This activity took more time to conduct than anticipated due to health and safety plan development and the requirement for a CPL observer be on-site
- Pacific Gas and Electric (PG&E) has reviewed the electrical power requirement for the SVE system and has determined the necessary design requirements for the electrical power system.
- URS has subcontracted with Stratus Environmental, Inc. (Stratus) to design and install the electrical power system, as per the PG&E and Alameda County Building Department requirements.
- In association with the installation of the electrical power system, the Alameda County Building Department will need to approve the plans for the power pole prior to construction. The time requirements for approval are uncertain. Plan development and submittal will be completed by the week of June 16, 2008.
- URS has requested permission from the San Francisco Public Utilities Commission (SFPUC) to install the electrical power system, which will include three power poles, wiring, and the electrical panel. URS is actively working with the SFPUC but the time requirements for approval are uncertain at this time.
- URS and Stratus will reinstall the plumbing for the SVE wells and mobilize the SVE system to the site after the trees are removed.
- URS will complete the restart of the SVE system once all PG&E, Alameda County Building Department, and SFPUC requirements have been met and the electrical supply equipment is installed.

Based on the time in which it will take PG&E to provide the electrical power hook-up, Alameda County Building Department to approve the electrical power design, and SFPUC to approve the electrical power system installation, URS requests on CPL's behalf, that ACEH extend the SVE system operation deadline. URS will keep ACEH informed of our progress and anticipated electrical power system and SVE system installation/startup date.

URS will update ACEH again by July 15, 2008, or earlier, with the developments of the above mentioned items and any other significant information pertaining to the restarting of an SVE System.
