Subject: SLIC Case No. RO0002892, Chevron Sunol Pipeline, 2793 Calaveras Rd, Sunol, CA
Proposed Installation – SVE System

Dear Mr. Wickham:

URS, on behalf of Chevron Pipeline Company (CPL), is updating Alameda County Environmental Health (ACEH) regarding the restarting of a Soil Vapor Extraction (SVE) System at the CPL site near Sunol, California.

Summary of Proposed Activities

URS and CPL have conducted the following in order to facilitate site activities:

- URS has received initial permit confirmation from the Alameda County Building Department (ACBD) to proceed with the current electrical system installation. However, The Alameda County Fire Department (ACFD) has requested additional measures, the installation of a fire road and 2,500 gallon water tank, be installed as a condition to the permit. Stratus Environmental Inc. (Stratus) is requesting additional information from the ACFD Deputy Marshall in order to facilitate the request including the definition of an all weather fire road. This will delay the installation of the electrical and SVE systems. URS has offered to meet with the ACFD at the site to discuss placement of the fire road and water tank. Once all issues are resolved, the permit will be issued and installation of the electrical system and SVE system will begin. URS will continue to update ACEH with regard to the building permit.
- CPL has signed the Pacific Gas and Electric (PG&E) contract and paid the required deposit. Once the electrical system is installed and SVE system in place, CPL will schedule PG&E to provide the electrical power service to the SVE system. Scheduling PG&E will require full completion of the electrical system and inspection.
- URS will proceed with the proposed pump test at SVE-8 on 8/22/08 in order to determine the most effective remediation option at this location. Groundwater has been measured in SVE-8 since installation.
- The ACBD and ACFD approval process has delayed the start of work with the addition of the new requirements of a fire road and water tank. URS will update ACEH by September 15, 2008 or earlier, with developments of the above mentioned items and any other significant information pertaining to the restarting of the SVE system.
