WA Job #81-429-104

Dear Ms. Shin:

We have included revised QA/QC reports for the first, second and third quarter 1993 analytic results for ground water. Please insert these updated reports into their respective quarterly monitoring reports. The revised results show that the concentrations reported as gasoline include discrete peaks not indicative of gasoline.

Please call me at 450-6108 if you have any questions or comments.

Sincerely,
Weiss Associates

David Elias
Senior Staff Geologist
